1. Image Prompts (167 beats)

Each beat is at most 5 seconds of narration (2.9 words per second). Every prompt works on its own.

Beat 1 (0:00, ~3.8s)

[Script Segment] "Nearly five thousand years separate a dented cap of hammered copper"

> **Image Prompt:** A battered, greenish hammered-copper Sumerian helmet sits alone on a dark worn wooden table, dents and verdigris across its dome. Slow push-in toward the dented crown. Camera: high 3/4 angle close-up, shallow depth of field. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: ancient, quiet, reverent. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high 3/4 angle close-up, shallow depth of field
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** ancient, quiet, reverent
- **Action:** Slow push-in toward the dented crown

Beat 2 (0:03, ~2.1s)

[Script Segment] "from the helmet soldiers wear today."

> **Image Prompt:** A modern matte-tan composite combat helmet with side rails and a night-vision mount sits on a dark worn wooden table, a dented hammered-copper helmet blurred visible in the far background. Rack focus from the blurred copper helmet to the sharp modern helmet. Camera: eye-level medium close-up, shallow depth of field. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: contrast, quiet awe. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level medium close-up, shallow depth of field
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** contrast, quiet awe
- **Action:** Rack focus from the blurred copper helmet to the sharp modern helmet

Beat 3 (0:05, ~3.8s)

[Script Segment] "Every era added something new. A tougher metal. A smarter shape."

> **Image Prompt:** A long dark wooden table holds a chronological row of helmets fading into darkness: copper, bronze Corinthian, iron Roman, medieval great helm, WWI steel, modern composite, each in its own soft pool of light. Slow lateral slide along the row of helmets. Camera: low side angle along the table, deep perspective, shallow depth of field. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: epic, museum-like. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail

> (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle along the table, deep perspective, shallow depth of field
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** epic, museum-like
- **Action:** Slow lateral slide along the row of helmets

Beat 4 (0:09, ~2.8s)

[Script Segment] "A better way to soak up a blow."

> **Image Prompt:** Cutaway view of a modern combat helmet resting on a dark table, revealing layered shell, foam pads and inner lining in cross-section. Slow orbit around the cutaway edge. Camera: macro close-up on the cross-section. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: technical, curious. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up on the cross-section
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** technical, curious
- **Action:** Slow orbit around the cutaway edge

Beat 5 (0:12, ~3.8s)

[Script Segment] "And every one of those changes happened for the same reason."

> **Image Prompt:** A row of historic helmets on a dark table seen from above, each placed on a small worn wooden block, faint dust drifting in the air. Slow overhead crane down toward the row. Camera: top-down high angle, wide. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: contemplative. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** top-down high angle, wide
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** contemplative
- **Action:** Slow overhead crane down toward the row

Beat 6 (0:16, ~2.8s)

[Script Segment] "The helmet before it had let something through."

> **Image Prompt:** Close-up of an ancient bronze helmet with a deep split crack and a punctured hole through its side, resting on dark wood, small metal shards beside it. Slow push-in toward the hole. Camera: macro close-up, very shallow depth of field. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: grim, revealing. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up, very shallow depth of field
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** grim, revealing
- **Action:** Slow push-in toward the hole

Beat 7 (0:18, ~3.8s)

[Script Segment] "To follow that path, our team spent months digging through records"

> **Image Prompt:** A dark archive desk scattered with aged parchment sketches of helmets, an open leather-bound book, brass magnifying glass and a single candle. Slow glide across the papers. Camera: high 3/4 angle tabletop close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: scholarly, intimate. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high 3/4 angle tabletop close-up
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** scholarly, intimate
- **Action:** Slow glide across the papers

Beat 8 (0:22, ~3.1s)

[Script Segment] "and rebuilding each helmet in 3D, piece by piece."

> **Image Prompt:** A medieval steel helmet assembling itself in mid-air above a dark table, its individual plates and rivets floating into place piece by piece, exploded-view style. Parts drift together and lock into place. Camera: eye-level medium shot, shallow depth of field. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: precise, satisfying. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level medium shot, shallow depth of field
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** precise, satisfying
- **Action:** Parts drift together and lock into place

Beat 9 (0:25, ~2.8s)

[Script Segment] "It starts in ancient Mesopotamia, around 2500 BC."

> **Image Prompt:** Ancient Mesopotamian mud-brick ziggurat silhouetted at dusk under a hazy amber sky, dust in the air, a copper helmet resting on a mud-brick ledge in the foreground. Slow push past the helmet toward the ziggurat. Camera: low-angle wide establishing shot, foreground helmet out of focus. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: ancient, mysterious. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle wide establishing shot, foreground helmet out of focus

- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** ancient, mysterious
- **Action:** Slow push past the helmet toward the ziggurat

Beat 10 (0:28, ~3.8s)

[Script Segment] "Sumerian soldiers marching in tight formations wore helmets of beaten copper"

> **Image Prompt:** Rows of identical hammered-copper Sumerian helmets lined up in tight formation on a dark wooden table, like an army of empty helmets, wooden-shafted spears behind them. Slow lateral track along the ranks. Camera: low side angle, deep perspective. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: disciplined, ancient. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle, deep perspective
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** disciplined, ancient
- **Action:** Slow lateral track along the ranks

Beat 11 (0:32, ~2.8s)

[Script Segment] "over padded leather caps. The idea was simple."

> **Image Prompt:** A worn padded leather cap beside a hammered-copper helmet on dark wood, stitching and cracked leather visible, the helmet tilted to show the cap fits inside. Helmet slowly lowers over the leather cap. Camera: macro 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: simple, tactile. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro 3/4 close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** simple, tactile
- **Action:** Helmet slowly lowers over the leather cap

Beat 12 (0:35, ~3.1s)

[Script Segment] "Put something hard between the skull and the weapon."

> **Image Prompt:** A bronze-age stone mace head resting against the side of a copper helmet on a dark table, the helmet's surface dented where the mace touches. Slow push-in on the point of contact. Camera: extreme close-up, shallow depth of field. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: tense, primal. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** extreme close-up, shallow depth of field
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges

- **Mood:** tense, primal
- **Action:** Slow push-in on the point of contact

Beat 13 (0:38, ~2.8s)

[Script Segment] "For rulers, the same idea became a symbol."

> **Image Prompt:** An ornate golden Sumerian ceremonial helmet on a black velvet museum plinth, gleaming softly in darkness. Slow orbit around the plinth. Camera: low 3/4 angle medium shot. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: regal, reverent. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low 3/4 angle medium shot
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** regal, reverent
- **Action:** Slow orbit around the plinth

Beat 14 (0:41, ~3.8s)

[Script Segment] "One Sumerian ruler was buried with a helmet of solid gold,"

> **Image Prompt:** A golden Sumerian helmet half-buried in dry earth inside a dim ancient tomb chamber, dust particles floating in a single shaft of light. Dust drifts through the light shaft as the camera descends. Camera: high angle looking down into the tomb. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: sacred, hidden. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high angle looking down into the tomb
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** sacred, hidden
- **Action:** Dust drifts through the light shaft as the camera descends

Beat 15 (0:44, ~3.1s)

[Script Segment] "shaped to imitate hair tied up in a knot."

> **Image Prompt:** Extreme detail of a golden Sumerian helmet's surface, finely engraved wavy hair strands and a tied knot at the back. Slow pan across the engraved hair. Camera: macro close-up, razor-thin depth of field. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: intricate, admiring. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up, razor-thin depth of field
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** intricate, admiring

- **Action:** Slow pan across the engraved hair

Beat 16 (0:47, ~4.5s)

[Script Segment] "It was never meant to be hit. It was meant to be seen."

> **Image Prompt:** A golden Sumerian helmet behind museum glass, warm reflections on the glass, surrounding gallery in deep darkness. Slow pull-back revealing the glass case. Camera: eye-level medium shot. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: majestic, still. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level medium shot
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** majestic, still
- **Action:** Slow pull-back revealing the glass case

Beat 17 (0:52, ~2.8s)

[Script Segment] "But copper had a weakness. It was soft."

> **Image Prompt:** A copper helmet on a dark table with a fresh deep dent in its crown, a few metal flakes beside it. Camera holds while a small dust puff settles from the dent. Camera: macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: vulnerable. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** vulnerable
- **Action:** Camera holds while a small dust puff settles from the dent

Beat 18 (0:55, ~4.8s)

[Script Segment] "A heavy strike could dent it deep enough to injure the man beneath it."

> **Image Prompt:** Cross-section cutaway of a copper helmet pressed inward by a dent, the deformed metal pushing into the padded cap beneath it, on a dark table. Dent slowly deepens in slow motion. Camera: side-on cutaway close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: tense, technical. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side-on cutaway close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** tense, technical
- **Action:** Dent slowly deepens in slow motion

Beat 19 (1:00, ~2.4s)

[Script Segment] "The answer arrived with the Bronze Age."

> **Image Prompt:** A glowing crucible of molten bronze inside a dark ancient workshop, sparks rising, stone tools around it. Molten metal ripples as sparks lift. Camera: low angle close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: transformative. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low angle close-up
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** transformative
- **Action:** Molten metal ripples as sparks lift

Beat 20 (1:02, ~3.1s)

[Script Segment] "By mixing copper with a small amount of tin,"

> **Image Prompt:** Two small piles on a dark wooden table, reddish copper nuggets and silvery tin ingots, beside a clay crucible. Tin ingot slowly slides toward the copper. Camera: high 3/4 tabletop close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: elemental, curious. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high 3/4 tabletop close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** elemental, curious
- **Action:** Tin ingot slowly slides toward the copper

Beat 21 (1:05, ~3.4s)

[Script Segment] "metalworkers created an alloy far harder than either metal alone."

> **Image Prompt:** A freshly cast golden-brown bronze ingot cooling on a stone slab, faint heat shimmer above it, dark workshop around. Heat shimmer rises and fades. Camera: macro close-up, shallow depth of field. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: discovery. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up, shallow depth of field
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** discovery
- **Action:** Heat shimmer rises and fades

Beat 22 (1:08, ~2.1s)

[Script Segment] "Bronze held its shape, resisted cutting,"

> **Image Prompt:** A bronze helmet on dark wood with a bronze blade resting against it, only a faint scratch left on the helmet's surface. Slow push-in on the faint scratch. Camera: extreme close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: resilient. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** extreme close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** resilient
- **Action:** Slow push-in on the faint scratch

Beat 23 (1:11, ~4.1s)

[Script Segment] "and could be polished to a shine that unsettled anyone facing it."

> **Image Prompt:** A highly polished bronze Greek helmet glinting in darkness, a sharp specular flare rolling across its dome. Light flare glides across the polished surface. Camera: low-angle close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: intimidating, striking. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle close-up
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** intimidating, striking
- **Action:** Light flare glides across the polished surface

Beat 24 (1:15, ~4.5s)

[Script Segment] "By the 7th century BC, Greek armorers had pushed bronze to its limit."

> **Image Prompt:** Dim ancient Greek armorer's workshop, bronze sheets, hammers and anvils on a worn bench, glowing coals in the background. Slow glide across the workbench. Camera: high 3/4 angle medium shot. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: craft, history. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high 3/4 angle medium shot
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** craft, history
- **Action:** Slow glide across the workbench

Beat 25 (1:19, ~1.7s)

[Script Segment] "They created the Corinthian helmet."

> **Image Prompt:** A gleaming bronze Corinthian helmet with almond eye openings and a long nose guard, displayed on a dark wooden stand. Slow reveal as the camera rises to eye level. Camera: eye-level frontal medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black,

> crisp rim highlights on metal edges. Mood: iconic, heroic. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level frontal medium close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** iconic, heroic
- **Action:** Slow reveal as the camera rises to eye level

Beat 26 (1:21, ~4.8s)

[Script Segment] "Hammered from a single sheet of metal, it wrapped the entire head and face,"

> **Image Prompt:** A flat bronze sheet on an anvil transforming into a Corinthian helmet shape, hammer marks visible across the curved metal. Bronze sheet curves and forms into the helmet. Camera: side 3/4 close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: craftsmanship. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side 3/4 close-up
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** craftsmanship
- **Action:** Bronze sheet curves and forms into the helmet

Beat 27 (1:26, ~3.1s)

[Script Segment] "leaving only narrow openings for the eyes and mouth."

> **Image Prompt:** Extreme close-up of a Corinthian helmet's narrow eye slits and mouth gap, darkness inside the openings. Slow push into the eye slit. Camera: frontal macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: mysterious, claustrophobic. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** frontal macro close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** mysterious, claustrophobic
- **Action:** Slow push into the eye slit

Beat 28 (1:29, ~1.7s)

[Script Segment] "Making one took enormous skill."

> **Image Prompt:** Weathered bronze-working tools laid out on dark wood: small hammers, stakes and a curved anvil horn beside a half-finished Corinthian helmet. Slow pan along the tools. Camera: top-down tabletop shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: respectful, craft. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood,

> aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** top-down tabletop shot
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** respectful, craft
- **Action:** Slow pan along the tools

Beat 29 (1:31, ~3.8s)

[Script Segment] "The smith had to stretch the bronze thin enough to wear,"

> **Image Prompt:** A hammer striking a bronze helmet shell on an anvil horn, the metal visibly thinning, tiny sparks and dust. Hammer strikes in slow motion. Camera: low side close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: labor, focus. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side close-up
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** labor, focus
- **Action:** Hammer strikes in slow motion

Beat 30 (1:34, ~4.5s)

[Script Segment] "yet keep it thick across the brow and crown, where blows landed most."

> **Image Prompt:** Cutaway cross-section of a Corinthian helmet on a dark table showing thicker bronze at the brow and crown and thinner walls at the sides. Slow orbit around the cross-section. Camera: side-on macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: technical, insightful. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side-on macro close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** technical, insightful
- **Action:** Slow orbit around the cross-section

Beat 31 (1:39, ~4.1s)

[Script Segment] "A single mistake could tear the sheet and ruin weeks of work."

> **Image Prompt:** A torn, split bronze helmet shell discarded on a dark anvil, jagged tear running through the metal. Slow push-in on the torn edge. Camera: macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: frustration, fragility. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface

> detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** frustration, fragility
- **Action:** Slow push-in on the torn edge

Beat 32 (1:43, ~3.4s)

[Script Segment] "It was superb protection. And that was exactly the problem."

> **Image Prompt:** A Corinthian helmet sitting on a dark stand, one half lit and one half swallowed by darkness. Light slowly dims across the helmet's face. Camera: eye-level frontal close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: ominous turn. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level frontal close-up
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** ominous turn
- **Action:** Light slowly dims across the helmet's face

Beat 33 (1:46, ~3.4s)

[Script Segment] "A soldier inside a Corinthian helmet could barely hear orders"

> **Image Prompt:** View from inside a Corinthian helmet looking out through narrow eye slits at a blurred ancient battlefield of spears and dust. Muffled, slightly unsteady drift. Camera: first-person POV through the eye slits. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: claustrophobic, isolated. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** first-person POV through the eye slits
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** claustrophobic, isolated
- **Action:** Muffled, slightly unsteady drift

Beat 34 (1:50, ~2.8s)

[Script Segment] "and could see almost nothing to his sides."

> **Image Prompt:** POV through Corinthian helmet eye slits, the edges of the frame blocked by dark bronze, only a narrow strip of a dusty battlefield visible ahead. Slow head-turn pan revealing only bronze at the sides. Camera: first-person POV. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: tense, blind. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** first-person POV

- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** tense, blind
- **Action:** Slow head-turn pan revealing only bronze at the sides

Beat 35 (1:53, ~3.8s)

[Script Segment] "So over the next few centuries, Greek designs slowly opened up."

> **Image Prompt:** Three Greek bronze helmets lined up left to right on dark wood: a closed Corinthian, a Chalcidian with ear openings, an open-faced Attic helmet. Slow lateral slide from closed to open designs. Camera: low side angle, shallow depth of field. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: evolution, progress. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle, shallow depth of field
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** evolution, progress
- **Action:** Slow lateral slide from closed to open designs

Beat 36 (1:56, ~4.1s)

[Script Segment] "Cheek pieces became hinged. Ear openings appeared. Protection was traded for awareness."

> **Image Prompt:** Close-up of an Attic Greek bronze helmet with hinged cheek pieces swinging open on small pins, ear cutouts visible. Cheek piece slowly swings open on its hinge. Camera: macro 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: clever, balanced. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro 3/4 close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** clever, balanced
- **Action:** Cheek piece slowly swings open on its hinge

Beat 37 (2:01, ~3.8s)

[Script Segment] "Then came Rome. And Rome faced a different problem entirely. Scale."

> **Image Prompt:** Hundreds of identical Roman helmets arranged in a vast grid on dark floor stretching into darkness. Slow crane up revealing the endless grid. Camera: high-angle wide shot. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: massive, imperial. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high-angle wide shot

- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** massive, imperial
- **Action:** Slow crane up revealing the endless grid

Beat 38 (2:04, ~3.8s)

[Script Segment] "Hand-shaping a full-face helmet took a skilled craftsman days of work."

> **Image Prompt:** A lone half-finished bronze helmet on a cluttered dark workbench beside a burned-down candle and scattered tools. Candle flame flickers as the camera holds. Camera: high 3/4 tabletop close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: slow, painstaking. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high 3/4 tabletop close-up
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** slow, painstaking
- **Action:** Candle flame flickers as the camera holds

Beat 39 (2:08, ~3.1s)

[Script Segment] "Rome needed to equip hundreds of thousands of men."

> **Image Prompt:** Endless rows of Roman shields, spears and helmets on wooden racks inside a dark stone armory. Slow push down the central aisle. Camera: low-angle one-point perspective. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: overwhelming scale. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle one-point perspective
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** overwhelming scale
- **Action:** Slow push down the central aisle

Beat 40 (2:11, ~4.5s)

[Script Segment] "So its legions adopted a simpler design borrowed from the Celts, the Montefortino."

> **Image Prompt:** A plain bronze Montefortino helmet with a top knob and small neck guard on a dark wooden stand. Slow orbit around the helmet. Camera: eye-level 3/4 medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: practical, sturdy. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level 3/4 medium close-up

- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** practical, sturdy
- **Action:** Slow orbit around the helmet

Beat 41 (2:16, ~4.1s)

[Script Segment] "A plain rounded bowl with a small neck guard and cheek pieces."

> **Image Prompt:** Exploded view of a Montefortino helmet floating over dark wood: rounded bronze bowl, separate cheek pieces and short neck guard. Parts separate slightly then hover. Camera: side-on medium shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: clear, technical. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side-on medium shot
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** clear, technical
- **Action:** Parts separate slightly then hover

Beat 42 (2:20, ~2.1s)

[Script Segment] "Fast to make. Easy to repair."

> **Image Prompt:** A row of identical Montefortino helmets on a workshop bench, one being patched with a small riveted bronze plate. Slow slide along the identical helmets. Camera: low side angle. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: efficient. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** efficient
- **Action:** Slow slide along the identical helmets

Beat 43 (2:22, ~3.1s)

[Script Segment] "These helmets were handed down from soldier to soldier,"

> **Image Prompt:** Three worn bronze Montefortino helmets of increasing age lined up on dark wood, scratches and green patina deepening from one to the next. Slow lateral slide from the newest to the oldest helmet. Camera: eye-level close-up, extreme shallow depth of field. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: legacy, continuity. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level close-up, extreme shallow depth of field

- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** legacy, continuity
- **Action:** Slow lateral slide from the newest to the oldest helmet

Beat 44 (2:25, ~4.5s)

[Script Segment] "and some survive today with several different owners' names punched into the metal."

> **Image Prompt:** Extreme close-up of dotted punched Latin letters along the neck guard of an ancient bronze helmet, green patina in the grooves. Slow pan along the punched letters. Camera: macro close-up, razor-thin depth of field. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: personal, haunting. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up, razor-thin depth of field
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** personal, haunting
- **Action:** Slow pan along the punched letters

Beat 45 (2:29, ~3.1s)

[Script Segment] "Over time, Roman workshops shifted from bronze to iron."

> **Image Prompt:** A bronze helmet and a dark iron helmet side by side on a forge bench, glowing coals behind. Rack focus from bronze to iron. Camera: low side close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: transition. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side close-up
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** transition
- **Action:** Rack focus from bronze to iron

Beat 46 (2:33, ~2.4s)

[Script Segment] "Iron was cheaper and far more plentiful."

> **Image Prompt:** A heap of raw iron ore and rough iron blooms piled on a dark workshop floor, faint glow from a furnace. Slow push-in on the ore pile. Camera: high-angle close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: abundant, raw. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high-angle close-up
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** abundant, raw

- **Action:** Slow push-in on the ore pile

Beat 47 (2:35, ~2.8s)

[Script Segment] "And with it came the Imperial Gallic helmet,"

> **Image Prompt:** A polished iron Roman Imperial Gallic helmet with brass decorations, brow ridge and wide neck guard on a dark stand. Slow reveal rising from below. Camera: low-angle 3/4 medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: powerful, imperial. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle 3/4 medium close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** powerful, imperial
- **Action:** Slow reveal rising from below

Beat 48 (2:38, ~3.1s)

[Script Segment] "with a reinforced brow ridge to stop downward blows"

> **Image Prompt:** Close-up of the raised reinforcing brow ridge across the front of an iron Roman helmet, a gladius edge resting on it. Blade slowly slides off the ridge. Camera: macro frontal close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: protective, smart. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro frontal close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** protective, smart
- **Action:** Blade slowly slides off the ridge

Beat 49 (2:41, ~3.8s)

[Script Segment] "and a wide flared guard protecting the back of the neck."

> **Image Prompt:** Rear view of an iron Roman Imperial Gallic helmet showing its wide flared neck guard over a dark stand. Slow orbit to the back. Camera: low rear 3/4 angle. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: solid, guarding. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low rear 3/4 angle
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** solid, guarding
- **Action:** Slow orbit to the back

Beat 50 (2:45, ~3.1s)

[Script Segment] "When the Western Empire collapsed, so did its workshops."

> **Image Prompt:** An abandoned Roman armory in ruins, collapsed roof beams, rusted helmets scattered in dust and rubble, pale light through a broken roof. Dust drifts down through light rays. Camera: high-angle wide shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: decline, melancholic. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high-angle wide shot
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** decline, melancholic
- **Action:** Dust drifts down through light rays

Beat 51 (2:48, ~4.8s)

[Script Segment] "Without large-scale industry, smiths turned to a design that needed less skill, the spangenhelm."

> **Image Prompt:** An early medieval spangenhelm with riveted iron frame strips and plates on a dark wooden table. Slow push-in. Camera: eye-level 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: rugged, makeshift. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level 3/4 close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** rugged, makeshift
- **Action:** Slow push-in

Beat 52 (2:53, ~1.7s)

[Script Segment] "Instead of one solid bowl,"

> **Image Prompt:** A solid one-piece iron helmet bowl beside a pile of separate iron strips and plates on dark wood. Camera slides from the solid bowl to the scattered parts. Camera: high 3/4 tabletop shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: comparison. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high 3/4 tabletop shot
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** comparison
- **Action:** Camera slides from the solid bowl to the scattered parts

Beat 53 (2:54, ~4.1s)

[Script Segment] "it used a frame of iron strips with plates riveted between them."

> **Image Prompt:** Exploded view of a spangenhelm floating above dark wood: iron frame strips, triangular plates and rivets assembling together. Rivets press in as plates lock into the frame. Camera: side-on medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: mechanical, clear. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side-on medium close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** mechanical, clear
- **Action:** Rivets press in as plates lock into the frame

Beat 54 (2:58, ~4.1s)

[Script Segment] "It was easy to build. But every seam was a weak point."

> **Image Prompt:** Extreme close-up of a riveted seam on a spangenhelm, small gaps between the plates and the frame. Slow track along the seam. Camera: macro close-up, razor-thin depth of field. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: suspicious, fragile. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up, razor-thin depth of field
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** suspicious, fragile
- **Action:** Slow track along the seam

Beat 55 (3:03, ~4.1s)

[Script Segment] "A hard enough blow could split a joint and drive straight through."

> **Image Prompt:** A spangenhelm with one riveted seam burst open, a plate bent inward and broken rivets scattered on dark wood. Broken rivet rolls to a stop. Camera: low macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: violent aftermath. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low macro close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** violent aftermath
- **Action:** Broken rivet rolls to a stop

Beat 56 (3:07, ~1.4s)

[Script Segment] "By the 11th century,"

> **Image Prompt:** A medieval forge interior at night, glowing furnace, hammers hanging on stone wall, iron helmets cooling on a bench. Slow push toward the glowing furnace. Camera: wide low angle. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: medieval, atmospheric. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** wide low angle
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** medieval, atmospheric
- **Action:** Slow push toward the glowing furnace

Beat 57 (3:08, ~4.8s)

[Script Segment] "smiths had relearned how to raise a helmet from a single piece of iron."

> **Image Prompt:** A single glowing iron disc being hammered over a rounded stake into a conical helmet shape, sparks flying in a dark forge. Hammer strikes in slow motion as the metal curves. Camera: low side close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: mastery. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side close-up
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** mastery
- **Action:** Hammer strikes in slow motion as the metal curves

Beat 58 (3:13, ~4.5s)

[Script Segment] "The result was the Norman nasal helmet. A conical shell that deflected blows,"

> **Image Prompt:** A conical Norman nasal helmet on a dark stand, a sword blade sliding off its sloped surface. Blade glances off the slope. Camera: eye-level 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: sturdy, clever. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level 3/4 close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** sturdy, clever
- **Action:** Blade glances off the slope

Beat 59 (3:17, ~3.1s)

[Script Segment] "with one narrow bar running down over the nose."

> **Image Prompt:** Frontal close-up of the narrow iron nasal bar on a Norman helmet, tool marks and rust spots visible. Slow tilt down along the bar. Camera: frontal macro close-up. Lighting: low raking side

> light from the right, long soft shadows, specular glints along edges. Mood: austere. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** frontal macro close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** austere
- **Action:** Slow tilt down along the bar

Beat 60 (3:21, ~3.1s)

[Script Segment] "Yet the rest of the face remained completely exposed."

> **Image Prompt:** A Norman nasal helmet on a featureless matte-grey museum mannequin head, the face area left bare except the thin nose bar. Slow push-in on the exposed face area. Camera: frontal eye-level close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: vulnerable. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** frontal eye-level close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** vulnerable
- **Action:** Slow push-in on the exposed face area

Beat 61 (3:24, ~4.1s)

[Script Segment] "And on medieval battlefields, arrows and blades went looking for exactly that."

> **Image Prompt:** Medieval arrows with bodkin heads stuck in dark muddy ground beside a fallen Norman helmet, drifting smoke. Smoke drifts as the camera lowers. Camera: low-angle ground-level shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: grim, dangerous. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle ground-level shot
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** grim, dangerous
- **Action:** Smoke drifts as the camera lowers

Beat 62 (3:28, ~2.1s)

[Script Segment] "So armorers decided to cover everything."

> **Image Prompt:** A medieval armorer's bench with large curved steel plates laid out in darkness, a hammer resting on top. Slow overhead glide. Camera: top-down tabletop shot. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: determined. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette

> of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** top-down tabletop shot
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** determined
- **Action:** Slow overhead glide

Beat 63 (3:30, ~3.1s)

[Script Segment] "In the late 12th century, the great helm appeared."

> **Image Prompt:** A flat-topped steel medieval great helm with narrow eye slits and breathing holes on a dark stand. Slow dramatic reveal from darkness as light rises. Camera: low-angle frontal medium close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: imposing, iconic. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle frontal medium close-up
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** imposing, iconic
- **Action:** Slow dramatic reveal from darkness as light rises

Beat 64 (3:33, ~3.1s)

[Script Segment] "A flat-topped steel cylinder that enclosed the entire head."

> **Image Prompt:** Side profile of a medieval great helm showing its cylindrical shape and flat top plate, rivets along the seams. Slow orbit to profile. Camera: eye-level side shot. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: bold, enclosed. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level side shot
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** bold, enclosed
- **Action:** Slow orbit to profile

Beat 65 (3:36, ~4.5s)

[Script Segment] "For the first time since the Greeks, a soldier's face vanished behind metal."

> **Image Prompt:** A bronze Corinthian helmet and a steel great helm facing each other on a dark table, both with dark eye slits. Rack focus from the Corinthian to the great helm. Camera: low side angle, shallow depth of field. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: echo of history. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint

> atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle, shallow depth of field
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** echo of history
- **Action:** Rack focus from the Corinthian to the great helm

Beat 66 (3:41, ~3.8s)

[Script Segment] "Knights began painting coats of arms on their shields and surcoats,"

> **Image Prompt:** A medieval heater shield with a freshly painted heraldic lion on a dark workbench, paint brushes and pigment pots beside it. Brush slowly finishes a stroke. Camera: high 3/4 close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: identity, color. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high 3/4 close-up
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** identity, color
- **Action:** Brush slowly finishes a stroke

Beat 67 (3:44, ~2.1s)

[Script Segment] "simply so they could be recognized."

> **Image Prompt:** Several medieval shields with distinct painted coats of arms leaning in a row against a dark stone wall, each beneath a great helm. Slow lateral slide along the shields. Camera: eye-level medium shot. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: pageantry. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level medium shot
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** pageantry
- **Action:** Slow lateral slide along the shields

Beat 68 (3:46, ~2.8s)

[Script Segment] "But the flat top had a fatal flaw."

> **Image Prompt:** Top-down view of a great helm's flat crown plate, scratches and a dent in the middle. Slow descent toward the dent. Camera: top-down close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: ominous. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** top-down close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** ominous
- **Action:** Slow descent toward the dent

Beat 69 (3:49, ~2.1s)

[Script Segment] "It met every overhead strike head-on,"

> **Image Prompt:** A heavy medieval sword coming straight down onto the flat top of a great helm on a dark stand, frozen at the moment of impact, sparks erupting. Slow-motion impact with sparks. Camera: low side angle close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: violent, tense. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** violent, tense
- **Action:** Slow-motion impact with sparks

Beat 70 (3:51, ~3.1s)

[Script Segment] "absorbing the full force instead of turning it aside."

> **Image Prompt:** Cutaway view of a great helm's flat top buckling straight down under a blade, the force lines visible as a faint glow pushing inward. Metal flexes downward in slow motion. Camera: side-on cutaway close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: technical, alarming. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side-on cutaway close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** technical, alarming
- **Action:** Metal flexes downward in slow motion

Beat 71 (3:54, ~2.8s)

[Script Segment] "So armorers raised the crown into a point."

> **Image Prompt:** A steel great helm crown being reshaped on an anvil, its flat top rising into a point under the hammer. Crown slowly rises into a cone. Camera: low side close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: inventive. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side close-up
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill

- **Mood:** inventive
- **Action:** Crown slowly rises into a cone

Beat 72 (3:57, ~4.5s)

[Script Segment] "This was the sugarloaf helm, and it did what flat steel could not."

> **Image Prompt:** A medieval sugarloaf helm with a pointed crown on a dark stand, polished steel catching a rim highlight. Slow orbit revealing the pointed crown. Camera: low-angle 3/4 medium close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: triumphant. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle 3/4 medium close-up
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** triumphant
- **Action:** Slow orbit revealing the pointed crown

Beat 73 (4:02, ~1.7s)

[Script Segment] "It made blades slide off."

> **Image Prompt:** A sword edge glancing off the pointed sugarloaf crown, a streak of sparks trailing along the curve. Blade slides off in slow motion. Camera: side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: satisfying. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** satisfying
- **Action:** Blade slides off in slow motion

Beat 74 (4:03, ~3.4s)

[Script Segment] "Underneath all that steel, knights wore something just as important."

> **Image Prompt:** A great helm lifted slightly off a dark stand, revealing shadowed shapes underneath. Helm slowly rises to reveal what is beneath. Camera: eye-level close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: curious, hidden. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** curious, hidden
- **Action:** Helm slowly rises to reveal what is beneath

Beat 75 (4:07, ~3.1s)

[Script Segment] "A padded arming cap and a hood of mail."

> **Image Prompt:** A quilted linen arming cap and a chainmail coif laid side by side on dark wood, every ring and stitch visible. Slow push across the textures. Camera: high 3/4 macro close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: tactile, detailed. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high 3/4 macro close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** tactile, detailed
- **Action:** Slow push across the textures

Beat 76 (4:10, ~3.4s)

[Script Segment] "The metal stopped the edge. The padding softened the shock."

> **Image Prompt:** Cutaway of a great helm worn over a mail coif and padded cap on a mannequin head, layers visible in cross-section. Slow pan across the layers from outside in. Camera: side-on cutaway close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: insightful. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side-on cutaway close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** insightful
- **Action:** Slow pan across the layers from outside in

Beat 77 (4:13, ~2.4s)

[Script Segment] "It was a lesson armies would forget,"

> **Image Prompt:** A dusty padded arming cap abandoned on a dark shelf, cobwebs and dust settling over it. Dust slowly drifts down. Camera: eye-level close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: forgotten, melancholic. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level close-up
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** forgotten, melancholic
- **Action:** Dust slowly drifts down

Beat 78 (4:16, ~2.8s)

[Script Segment] "and then have to learn all over again."

> **Image Prompt:** A dusty medieval arming cap beside a modern helmet foam pad on a dark table, both lit in the same pool of light. Rack focus from old padding to modern padding. Camera: low side close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: full-circle, reflective. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side close-up
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** full-circle, reflective
- **Action:** Rack focus from old padding to modern padding

Beat 79 (4:18, ~2.4s)

[Script Segment] "Vision and airflow were still a struggle."

> **Image Prompt:** Extreme close-up of a great helm's tiny breathing holes and narrow eye slit, faint warm breath vapor drifting out. Vapor curls out of the holes. Camera: macro frontal close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: suffocating. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro frontal close-up
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** suffocating
- **Action:** Vapor curls out of the holes

Beat 80 (4:21, ~3.4s)

[Script Segment] "In the 14th century, the bascinet introduced a clever fix."

> **Image Prompt:** A 14th-century steel bascinet helmet with a closed visor on a dark stand. Slow push-in. Camera: eye-level 3/4 medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: clever, refined. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level 3/4 medium close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** clever, refined
- **Action:** Slow push-in

Beat 81 (4:24, ~4.1s)

[Script Segment] "A visor mounted on pivots. Raise it to breathe and look around."

> **Image Prompt:** Close-up of a bascinet's side pivot pin, the visor slowly lifting upward. Visor rotates upward on its pivot. Camera: macro side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: mechanical, satisfying. Visual style: Dark Archive Macro,

> a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro side close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** mechanical, satisfying
- **Action:** Visor rotates upward on its pivot

Beat 82 (4:28, ~2.4s)

[Script Segment] "Lower it when the arrows started flying."

> **Image Prompt:** A bascinet visor snapping down closed while blurred arrows streak through the dark background. Visor drops shut as arrows fly past. Camera: low-angle close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: urgent. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle close-up
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** urgent
- **Action:** Visor drops shut as arrows fly past

Beat 83 (4:31, ~3.1s)

[Script Segment] "Some visors were drawn out into a sharp point,"

> **Image Prompt:** Side profile of a hounskull bascinet with a long pointed snout-like visor on a dark stand. Slow orbit to the profile. Camera: eye-level side shot. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: strange, menacing. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level side shot
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** strange, menacing
- **Action:** Slow orbit to the profile

Beat 84 (4:34, ~2.4s)

[Script Segment] "earning the nickname hounskull, or dog's face."

> **Image Prompt:** Frontal view of a pointed hounskull visor looking like a metal dog's muzzle, rows of breathing holes, emerging from darkness. Slow push-in on the snout. Camera: low-angle frontal close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: eerie, memorable. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle frontal close-up
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** eerie, memorable
- **Action:** Slow push-in on the snout

Beat 85 (4:36, ~4.1s)

[Script Segment] "That beak shape gave lances and arrows nothing flat to bite into."

> **Image Prompt:** An arrowhead deflecting off the sloped beak of a hounskull visor, the arrow shaft bending away. Arrow glances off in slow motion. Camera: side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: clever, kinetic. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** clever, kinetic
- **Action:** Arrow glances off in slow motion

Beat 86 (4:41, ~4.1s)

[Script Segment] "By the 1400s, helmets like the armet fitted the head so closely"

> **Image Prompt:** A 15th-century steel armet helmet with closely shaped cheek plates on a dark stand, polished steel with fine scratches. Slow orbit around the close-fitting shape. Camera: eye-level 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: elegant, refined. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level 3/4 close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** elegant, refined
- **Action:** Slow orbit around the close-fitting shape

Beat 87 (4:45, ~2.1s)

[Script Segment] "that they moved with the wearer."

> **Image Prompt:** An armet on a matte-grey mannequin head turning slowly, its hinged cheek plates fitting tightly to the jaw. Head and helmet rotate together. Camera: eye-level close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: fluid, precise. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges

- **Mood:** fluid, precise
- **Action:** Head and helmet rotate together

Beat 88 (4:47, ~2.4s)

[Script Segment] "Medieval head protection had reached its peak."

> **Image Prompt:** A complete polished medieval armet helmet alone on a dark pedestal in a single spotlight, like a museum masterpiece. Slow pull-back. Camera: low-angle medium shot. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: peak, majestic. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle medium shot
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** peak, majestic
- **Action:** Slow pull-back

Beat 89 (4:49, ~2.1s)

[Script Segment] "Then, gunpowder arrived on the battlefield."

> **Image Prompt:** A pile of black gunpowder on dark wood, a lit match descending toward it, sparks starting to flare. Powder ignites in a bright flash. Camera: low macro close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: dramatic turning point. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low macro close-up
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** dramatic turning point
- **Action:** Powder ignites in a bright flash

Beat 90 (4:51, ~1.7s)

[Script Segment] "As firearms grew more powerful,"

> **Image Prompt:** A flintlock musket resting on a dark wooden table with a lead ball and powder horn beside it. Slow lateral slide along the barrel. Camera: low side angle along the barrel. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: ominous. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle along the barrel
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** ominous
- **Action:** Slow lateral slide along the barrel

Beat 91 (4:53, ~4.8s)

[Script Segment] "armor thick enough to stop a musket ball became too heavy to fight in."

> **Image Prompt:** A very thick steel breastplate and helmet on a dark table, a flattened lead musket ball embedded in a shallow dent. Slow push-in on the flattened ball. Camera: macro close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: heavy, burdensome. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** heavy, burdensome
- **Action:** Slow push-in on the flattened ball

Beat 92 (4:58, ~2.1s)

[Script Segment] "Little by little, soldiers abandoned it."

> **Image Prompt:** Discarded rusting helmets and plate armor piled in a dim corner of a stone storeroom, dust in the air. Dust drifts in a faint light beam. Camera: high-angle medium shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: abandonment. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high-angle medium shot
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** abandonment
- **Action:** Dust drifts in a faint light beam

Beat 93 (5:00, ~4.8s)

[Script Segment] "By the 18th century, most infantry marched into battle wearing felt, cloth, and leather."

> **Image Prompt:** A black felt tricorne hat, a tall cloth shako and a leather cap arranged on a dark wooden table. Slow lateral slide across the hats. Camera: high 3/4 tabletop shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: exposed, era shift. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high 3/4 tabletop shot
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** exposed, era shift
- **Action:** Slow lateral slide across the hats

Beat 94 (5:05, ~1.7s)

[Script Segment] "Helmets survived mostly as decoration."

> **Image Prompt:** An ornate brass-crested parade helmet with a horsehair plume on a dark display stand. Slow orbit. Camera: eye-level 3/4 close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: ceremonial. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level 3/4 close-up
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** ceremonial
- **Action:** Slow orbit

Beat 95 (5:06, ~2.8s)

[Script Segment] "There were exceptions. Heavy cavalry, like Napoleon's cuirassiers,"

> **Image Prompt:** A Napoleonic French cuirassier steel helmet with brass crest and horsehair mane beside a polished steel breastplate on dark wood. Slow push-in. Camera: low-angle 3/4 medium shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: proud, martial. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle 3/4 medium shot
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** proud, martial
- **Action:** Slow push-in

Beat 96 (5:09, ~3.4s)

[Script Segment] "kept their steel helmets and breastplates well into the 1800s."

> **Image Prompt:** Close-up of a Napoleonic cuirassier breastplate's polished curve and brass rivets, a helmet softly blurred behind. Rack focus from breastplate to helmet. Camera: macro side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: enduring. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro side close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** enduring
- **Action:** Rack focus from breastplate to helmet

Beat 97 (5:13, ~4.1s)

[Script Segment] "But for the common foot soldier, the helmet had all but disappeared."

> **Image Prompt:** An empty wooden helmet stand on a dark table beside a simple cloth infantry cap. Slow push toward the empty stand. Camera: eye-level close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: absence. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level close-up
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** absence
- **Action:** Slow push toward the empty stand

Beat 98 (5:17, ~3.8s)

[Script Segment] "Prussia's famous spiked Pickelhaube of 1842 was made of hardened leather."

> **Image Prompt:** A black leather Prussian Pickelhaube with brass spike and eagle plate on a dark stand. Slow orbit around the spike. Camera: low-angle 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: iconic, proud. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle 3/4 close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** iconic, proud
- **Action:** Slow orbit around the spike

Beat 99 (5:21, ~3.1s)

[Script Segment] "It looked impressive, but it offered almost no protection."

> **Image Prompt:** Cutaway of a Pickelhaube showing thin hardened leather walls, a small metal fragment punched through the side. Slow push-in on the puncture. Camera: side cutaway macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: ironic, fragile. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side cutaway macro close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** ironic, fragile
- **Action:** Slow push-in on the puncture

Beat 100 (5:24, ~2.8s)

[Script Segment] "For nearly two hundred years, that seemed acceptable."

> **Image Prompt:** A row of cloth and leather military caps from different eras on a long dark table, dust drifting. Slow lateral slide along the caps. Camera: low side angle. Lighting: narrow overhead spotlight

> forming a pool of light on the table, everything else falling into black. Mood: calm before the storm. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** calm before the storm
- **Action:** Slow lateral slide along the caps

Beat 101 (5:26, ~0.7s)

[Script Segment] "Until 1914."

> **Image Prompt:** A brass artillery shell standing upright on a dark table in a single harsh spotlight. Hard cut to stillness. Camera: low-angle close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: ominous, abrupt. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle close-up
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** ominous, abrupt
- **Action:** Hard cut to stillness

Beat 102 (5:27, ~2.8s)

[Script Segment] "The First World War was dominated by artillery."

> **Image Prompt:** A muddy WWI battlefield at dusk, row of field artillery guns silhouetted, smoke and haze, no people. Slow push across the gun line. Camera: low-angle wide shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: grim, overwhelming. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle wide shot
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** grim, overwhelming
- **Action:** Slow push across the gun line

Beat 103 (5:30, ~4.8s)

[Script Segment] "Shells burst above the trenches, raining hot metal fragments down on the men below."

> **Image Prompt:** An airburst shell exploding above an empty WWI trench at night, glowing jagged metal fragments falling toward sandbags. Fragments rain down in slow motion. Camera: low-angle looking up from the trench. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: terrifying. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-

> artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle looking up from the trench
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** terrifying
- **Action:** Fragments rain down in slow motion

Beat 104 (5:35, ~4.8s)

[Script Segment] "A soldier only had to raise his head above the parapet to be struck."

> **Image Prompt:** Point of view from inside a WWI trench looking just over sandbags at a smoky no-man's-land, barbed wire silhouettes. Slow rise above the parapet. Camera: first-person POV at sandbag height. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: tense, exposed. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** first-person POV at sandbag height
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** tense, exposed
- **Action:** Slow rise above the parapet

Beat 105 (5:39, ~2.8s)

[Script Segment] "And most of them were wearing fabric caps."

> **Image Prompt:** A soft wool WWI-era peaked cloth cap lying on wet sandbags, mud and rain drops. Raindrops hit the cap. Camera: macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: vulnerable, sad. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** vulnerable, sad
- **Action:** Raindrops hit the cap

Beat 106 (5:42, ~4.8s)

[Script Segment] "France reacted first. Its soldiers began receiving steel skullcaps to wear underneath their kepis."

> **Image Prompt:** A thin steel skullcap beside a red-and-blue French kepi on a dark table, the cap tilted to show it fits inside. Skullcap slides into the kepi. Camera: high 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: urgent improvisation. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights,

> extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high 3/4 close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** urgent improvisation
- **Action:** Skullcap slides into the kepi

Beat 107 (5:47, ~3.8s)

[Script Segment] "Within months, the army introduced a full steel helmet, the Adrian."

> **Image Prompt:** A horizon-blue French Adrian helmet with its distinctive crest ridge and small brim on a dark stand. Slow orbit around the crest. Camera: eye-level 3/4 medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: emblematic. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level 3/4 medium close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** emblematic
- **Action:** Slow orbit around the crest

Beat 108 (5:51, ~4.5s)

[Script Segment] "Britain followed with the Brodie helmet. Its design was brilliant in its simplicity."

> **Image Prompt:** A khaki-green British Brodie helmet with wide flat brim on dark wood, simple and clean. Slow crane down from above. Camera: high-angle close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: simple, smart. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high-angle close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** simple, smart
- **Action:** Slow crane down from above

Beat 109 (5:55, ~3.4s)

[Script Segment] "It was pressed from a single sheet of manganese steel,"

> **Image Prompt:** An industrial press stamping a flat steel sheet into a Brodie helmet shape in a dark factory, sparks and steam. Press slams down in slow motion. Camera: low side medium shot. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: industrial, powerful. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights,

> extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side medium shot
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** industrial, powerful
- **Action:** Press slams down in slow motion

Beat 110 (5:59, ~2.4s)

[Script Segment] "a process fast enough to produce millions."

> **Image Prompt:** A conveyor line in a dim factory carrying hundreds of identical Brodie helmets into the distance. Slow track alongside the conveyor. Camera: low side angle, deep perspective. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: mass production. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle, deep perspective
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** mass production
- **Action:** Slow track alongside the conveyor

Beat 111 (6:01, ~4.8s)

[Script Segment] "Its wide, shallow brim shielded the head and shoulders from fragments falling from above."

> **Image Prompt:** A Brodie helmet on a mannequin bust in a dark space, glowing metal fragments falling from above and bouncing off the wide brim. Fragments glance off the brim. Camera: high-angle 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: protective, effective. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high-angle 3/4 close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** protective, effective
- **Action:** Fragments glance off the brim

Beat 112 (6:06, ~3.1s)

[Script Segment] "Germany went further. In 1916, it introduced the Stahlhelm."

> **Image Prompt:** A field-grey German M1916 Stahlhelm on a dark stand, emerging from shadow. Slow reveal as light rises. Camera: low-angle frontal close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: imposing. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail

> (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle frontal close-up
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** imposing
- **Action:** Slow reveal as light rises

Beat 113 (6:09, ~4.1s)

[Script Segment] "Made of nickel steel, its deep shape extended down over the ears"

> **Image Prompt:** Side profile of a German Stahlhelm showing its deep skirt flaring down over the ear area, ventilation lugs visible. Slow track along the deep skirt. Camera: eye-level side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: robust. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level side close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** robust
- **Action:** Slow track along the deep skirt

Beat 114 (6:13, ~2.1s)

[Script Segment] "and the back of the neck."

> **Image Prompt:** Rear 3/4 view of a German Stahlhelm showing the flared neck protection. Slow orbit to the back. Camera: low rear angle close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: enclosing. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low rear angle close-up
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** enclosing
- **Action:** Slow orbit to the back

Beat 115 (6:15, ~4.1s)

[Script Segment] "It became one of the most recognizable silhouettes of the twentieth century."

> **Image Prompt:** Pure black silhouette of a German Stahlhelm against a softly glowing grey background haze. Slow push-in on the silhouette. Camera: eye-level side shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: iconic, haunting. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level side shot

- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** iconic, haunting
- **Action:** Slow push-in on the silhouette

Beat 116 (6:19, ~3.1s)

[Script Segment] "Germany even tried to add an extra steel plate"

> **Image Prompt:** A thick steel brow plate resting on dark wood beside a Stahlhelm. Slow push across the heavy plate. Camera: high 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: experimental. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high 3/4 close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** experimental
- **Action:** Slow push across the heavy plate

Beat 117 (6:23, ~4.8s)

[Script Segment] "that hung from lugs on the front, meant to stop bullets at the brow."

> **Image Prompt:** A heavy steel brow plate hooked onto the side lugs of a German Stahlhelm, a flattened bullet stuck in its surface. Slow push-in on the flattened bullet. Camera: frontal macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: tough. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** frontal macro close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** tough
- **Action:** Slow push-in on the flattened bullet

Beat 118 (6:27, ~4.8s)

[Script Segment] "It worked, but it was so heavy that few soldiers wore it for long."

> **Image Prompt:** A Stahlhelm with its brow plate sitting on a rusted old balance scale that tips heavily to one side. Scale slowly sinks under the weight. Camera: eye-level medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: burdensome. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level medium close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** burdensome

- **Action:** Scale slowly sinks under the weight

Beat 119 (6:32, ~2.4s)

[Script Segment] "Once again, protection had collided with weight."

> **Image Prompt:** A medieval great helm and a WWI Stahlhelm with brow plate side by side on a dark table, both heavy and imposing. Slow pull-back revealing both. Camera: low side angle. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: history repeating. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** history repeating
- **Action:** Slow pull-back revealing both

Beat 120 (6:35, ~2.4s)

[Script Segment] "Steel helmets sharply reduced fatal head wounds."

> **Image Prompt:** A row of WWI steel helmets on dark wood, Adrian, Brodie and Stahlhelm, each with small dents from fragments. Slow lateral slide along the dented helmets. Camera: low side angle. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: relief, vindication. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** relief, vindication
- **Action:** Slow lateral slide along the dented helmets

Beat 121 (6:37, ~2.4s)

[Script Segment] "But they still had a hidden problem."

> **Image Prompt:** Inside view of a WWI steel helmet showing a thin leather liner pressed tight against the shell. Slow push into the dark interior. Camera: low-angle interior close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: suspicious. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle interior close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** suspicious
- **Action:** Slow push into the dark interior

Beat 122 (6:39, ~3.8s)

[Script Segment] "When a fragment hit, the shell pressed directly against the skull,"

> **Image Prompt:** Cutaway of a WWI helmet on a mannequin head, a fragment impact denting the steel straight into the skull area with no gap. Dent pushes inward in slow motion. Camera: side-on cutaway close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: tense, technical. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side-on cutaway close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** tense, technical
- **Action:** Dent pushes inward in slow motion

Beat 123 (6:43, ~3.1s)

[Script Segment] "passing much of the impact straight into the wearer."

> **Image Prompt:** Cutaway diagram-like render showing glowing shockwave lines traveling from a helmet dent directly into a mannequin skull. Shockwave pulses inward. Camera: side-on close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: alarming. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side-on close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** alarming
- **Action:** Shockwave pulses inward

Beat 124 (6:46, ~3.8s)

[Script Segment] "In 1941, the United States answered this with the M1 helmet."

> **Image Prompt:** An olive-drab US M1 helmet with chinstrap on a dark wooden stand. Slow orbit. Camera: eye-level 3/4 medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: confident, iconic. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level 3/4 medium close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** confident, iconic
- **Action:** Slow orbit

Beat 125 (6:50, ~3.1s)

[Script Segment] "It used two separate parts. An outer steel shell,"

> **Image Prompt:** An M1 helmet's steel shell lifting upward off its inner liner on a dark table, separating into two parts. Shell rises and separates from liner. Camera: eye-level side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: revealing. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level side close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** revealing
- **Action:** Shell rises and separates from liner

Beat 126 (6:53, ~4.1s)

[Script Segment] "and a lighter liner inside it with an adjustable web of straps."

> **Image Prompt:** Close-up of an M1 helmet liner's interior showing cotton webbing straps, a sweatband and adjustment buckles. Slow pan across the webbing. Camera: high-angle macro close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: engineered, detailed. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high-angle macro close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** engineered, detailed
- **Action:** Slow pan across the webbing

Beat 127 (6:57, ~3.4s)

[Script Segment] "That gap between steel and skull became a crumple zone."

> **Image Prompt:** Cutaway of an M1 helmet on a mannequin head showing a clear gap between the steel shell and the head, held by webbing. Gap glows faintly as the camera pushes in. Camera: side-on cutaway close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: insightful. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side-on cutaway close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** insightful
- **Action:** Gap glows faintly as the camera pushes in

Beat 128 (7:01, ~4.1s)

[Script Segment] "The shell could take a dent without the dent reaching the head."

> **Image Prompt:** Cutaway of an M1 helmet denting inward from a fragment while the webbing gap keeps the dent from touching the mannequin's head. Dent forms in slow motion and stops short. Camera: side-on cutaway close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: relief, satisfying. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side-on cutaway close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** relief, satisfying
- **Action:** Dent forms in slow motion and stops short

Beat 129 (7:05, ~2.1s)

[Script Segment] "Soldiers nicknamed it the steel pot,"

> **Image Prompt:** A dented olive-drab M1 helmet upside down on a dark wooden table like a bowl. Slow crane down into the bowl. Camera: high-angle close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: warm, informal. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high-angle close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** warm, informal
- **Action:** Slow crane down into the bowl

Beat 130 (7:07, ~3.1s)

[Script Segment] "and they used it as far more than armor."

> **Image Prompt:** An M1 helmet surrounded by field items on dark wood: a canteen, folding shovel, mess kit and a bar of soap. Slow overhead glide. Camera: top-down tabletop shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: resourceful. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** top-down tabletop shot
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** resourceful
- **Action:** Slow overhead glide

Beat 131 (7:10, ~3.1s)

[Script Segment] "It became a wash basin, a shovel, a seat,"

> **Image Prompt:** An upturned M1 helmet filled with soapy water beside a shaving brush on a wooden crate at dusk. Ripples spread across the water. Camera: low 3/4 close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: human, everyday. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low 3/4 close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** human, everyday
- **Action:** Ripples spread across the water

Beat 132 (7:13, ~3.1s)

[Script Segment] "and even a cooking pot over an open fire."

> **Image Prompt:** An M1 helmet shell hanging over a small campfire at night, steam rising from water inside. Steam curls upward, embers drift. Camera: low-angle close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Mood: warm, survival. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle close-up
- **Lighting:** warm flickering orange glow from a forge or flame mixed with cold grey ambient fill
- **Mood:** warm, survival
- **Action:** Steam curls upward, embers drift

Beat 133 (7:16, ~4.8s)

[Script Segment] "The M1 served for more than forty years. But steel had reached its limit."

> **Image Prompt:** A worn, scratched M1 helmet with faded paint resting alone on a dark shelf, dust settling. Slow push-in on the worn surface. Camera: eye-level close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: aging, end of era. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level close-up
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** aging, end of era
- **Action:** Slow push-in on the worn surface

Beat 134 (7:21, ~4.8s)

[Script Segment] "To make it stronger, you had to make it thicker. And thicker meant heavier."

> **Image Prompt:** Three steel helmet cross-sections on dark wood, each thicker than the last, beside an old brass balance scale tipping under the thickest. Scale tips under the heaviest section. Camera: low side close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim

> highlights on metal edges. Mood: dilemma. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** dilemma
- **Action:** Scale tips under the heaviest section

Beat 135 (7:26, ~2.1s)

[Script Segment] "The breakthrough came from a laboratory."

> **Image Prompt:** A dim 1960s chemistry laboratory, glass beakers, flasks and coiled tubing on a lab bench, a single desk lamp glowing. Slow glide along the bench. Camera: high 3/4 medium shot. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: discovery, hopeful. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high 3/4 medium shot
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** discovery, hopeful
- **Action:** Slow glide along the bench

Beat 136 (7:28, ~3.4s)

[Script Segment] "In 1965, DuPont chemist Stephanie Kwolek discovered a synthetic fiber"

> **Image Prompt:** A glass beaker of cloudy liquid on a lab bench, a thin golden fiber being drawn up out of it, other glassware blurred behind. Fiber slowly lifts from the liquid. Camera: macro close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: breakthrough. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** breakthrough
- **Action:** Fiber slowly lifts from the liquid

Beat 137 (7:32, ~3.4s)

[Script Segment] "that, weight for weight, was five times stronger than steel."

> **Image Prompt:** An antique brass balance with a small coil of golden aramid fiber on one pan and a steel bar on the other, perfectly level. Balance settles level. Camera: eye-level close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: astonishing. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life

> look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** astonishing
- **Action:** Balance settles level

Beat 138 (7:35, ~1.4s)

[Script Segment] "It was called Kevlar."

> **Image Prompt:** A spool of golden-yellow Kevlar fiber woven into tight fabric, macro detail of the weave on dark wood. Slow push across the weave. Camera: macro close-up, razor-thin depth of field. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: modern, strong. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up, razor-thin depth of field
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** modern, strong
- **Action:** Slow push across the weave

Beat 139 (7:36, ~3.8s)

[Script Segment] "In the early 1980s, the US Army adopted the PASGT helmet,"

> **Image Prompt:** A woodland-camouflage-covered PASGT helmet on a dark stand. Slow orbit. Camera: eye-level 3/4 medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: modern era. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level 3/4 medium close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** modern era
- **Action:** Slow orbit

Beat 140 (7:40, ~3.1s)

[Script Segment] "built from layers of Kevlar bonded together with resin."

> **Image Prompt:** Exploded view of golden Kevlar fabric layers stacking and fusing together with glossy resin, floating above dark wood. Layers stack and fuse. Camera: side-on close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: engineered. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high

> surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side-on close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** engineered
- **Action:** Layers stack and fuse

Beat 141 (7:43, ~4.8s)

[Script Segment] "Instead of resisting a fragment with hard metal, its fibers stretched and caught it,"

> **Image Prompt:** Extreme macro of woven Kevlar fibers stretching around a jagged metal fragment, catching it like a net. Fibers stretch in slow motion and hold. Camera: macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: technical, impressive. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** technical, impressive
- **Action:** Fibers stretch in slow motion and hold

Beat 142 (7:48, ~2.4s)

[Script Segment] "spreading the energy across the entire shell."

> **Image Prompt:** Cutaway of a Kevlar helmet shell with glowing energy ripples spreading outward from an impact point. Ripples spread across the shell. Camera: side cutaway close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: insightful. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side cutaway close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** insightful
- **Action:** Ripples spread across the shell

Beat 143 (7:51, ~3.8s)

[Script Segment] "For roughly the same weight as steel, it stopped far more."

> **Image Prompt:** An M1 steel helmet and a PASGT Kevlar helmet on opposite pans of an antique brass balance, nearly level. Balance settles near level. Camera: eye-level medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: triumphant. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level medium close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** triumphant
- **Action:** Balance settles near level

Beat 144 (7:54, ~1.4s)

[Script Segment] "Its shape looked familiar."

> **Image Prompt:** A PASGT helmet on a dark table with its deep sides catching a rim of light. Slow orbit to profile. Camera: eye-level side shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: curious. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level side shot
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** curious
- **Action:** Slow orbit to profile

Beat 145 (7:56, ~4.1s)

[Script Segment] "The deep sides covering the ears and neck echoed the German Stahlhelm"

> **Image Prompt:** Silhouettes of a German Stahlhelm and a US PASGT helmet side by side in profile, near-identical outlines. Silhouettes slide together to overlap. Camera: eye-level side shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: echo, surprising. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level side shot
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** echo, surprising
- **Action:** Silhouettes slide together to overlap

Beat 146 (8:00, ~3.1s)

[Script Segment] "so closely that American troops nicknamed it the Fritz."

> **Image Prompt:** A PASGT helmet on dark wood with a WWI Stahlhelm softly blurred behind it in the same pose. Rack focus between the two helmets. Camera: low side angle. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: ironic. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black

- **Mood:** ironic
- **Action:** Rack focus between the two helmets

Beat 147 (8:03, ~3.4s)

[Script Segment] "Nearly seventy years later, the best answer to falling fragments"

> **Image Prompt:** A 1916 Stahlhelm and a 1980s PASGT helmet facing each other on a long dark table, dust drifting between them. Slow lateral slide between them. Camera: low side angle. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: reflective. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** reflective
- **Action:** Slow lateral slide between them

Beat 148 (8:06, ~2.4s)

[Script Segment] "still looked like a design from 1916."

> **Image Prompt:** Close-up of a worn WWI Stahlhelm's deep skirt edge, chips in the field-grey paint. Slow push-in. Camera: macro side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: timeless. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro side close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** timeless
- **Action:** Slow push-in

Beat 149 (8:09, ~2.4s)

[Script Segment] "But modern wars revealed a new threat."

> **Image Prompt:** A modern desert-tan combat helmet resting on sandbags at dusk, a faint dust cloud rising in the distance. Dust drifts across the frame. Camera: low-angle close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: ominous. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle close-up
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** ominous
- **Action:** Dust drifts across the frame

Beat 150 (8:11, ~3.8s)

[Script Segment] "In Iraq and Afghanistan, many head injuries came not from penetration,"

> **Image Prompt:** An arid rocky desert landscape at dusk with drifting dust, a lone desert-tan helmet lying on rubble in the foreground. Slow push toward the helmet. Camera: low-angle wide shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: harsh. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle wide shot
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** harsh
- **Action:** Slow push toward the helmet

Beat 151 (8:15, ~4.1s)

[Script Segment] "but from blast and blunt force. The old strap suspension wasn't enough."

> **Image Prompt:** Cutaway of an older helmet with strap suspension on a mannequin head, a pressure wave ripple passing through it. Shockwave ripples through the helmet. Camera: side cutaway close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: tense, technical. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side cutaway close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** tense, technical
- **Action:** Shockwave ripples through the helmet

Beat 152 (8:19, ~1.4s)

[Script Segment] "The answer was padding."

> **Image Prompt:** Several shock-absorbing foam helmet pads laid out on dark wood, varied shapes, hook-and-loop backs. Slow overhead glide. Camera: top-down tabletop shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: simple solution. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** top-down tabletop shot
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** simple solution
- **Action:** Slow overhead glide

Beat 153 (8:21, ~3.8s)

[Script Segment] "Newer helmets replaced the web of straps with shock-absorbing foam pads,"

> **Image Prompt:** Inside view of a modern combat helmet showing foam pads arranged around the interior where webbing once was. Slow push into the interior. Camera: low-angle interior close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: modern, refined. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle interior close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** modern, refined
- **Action:** Slow push into the interior

Beat 154 (8:24, ~2.1s)

[Script Segment] "spreading every impact across the skull."

> **Image Prompt:** Cutaway of a modern padded helmet on a mannequin head, glowing impact energy spreading evenly through the foam pads. Energy diffuses through the pads. Camera: side cutaway close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: reassuring. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** side cutaway close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** reassuring
- **Action:** Energy diffuses through the pads

Beat 155 (8:26, ~2.8s)

[Script Segment] "Their edges were cut higher around the ears,"

> **Image Prompt:** Side profile of a modern high-cut combat helmet with raised edges above the ear area. Slow orbit to profile. Camera: eye-level side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: sleek. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level side close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** sleek
- **Action:** Slow orbit to profile

Beat 156 (8:29, ~2.4s)

[Script Segment] "leaving room for radios and hearing protection."

> **Image Prompt:** A high-cut helmet on a mannequin head fitted with tactical over-ear headset and boom microphone. Slow push-in on the headset. Camera: eye-level 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: technical,

> modern. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level 3/4 close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** technical, modern
- **Action:** Slow push-in on the headset

Beat 157 (8:32, ~1.7s)

[Script Segment] "Then materials moved forward again."

> **Image Prompt:** Abstract dark laboratory setting with a sheet of white composite material under a single lamp. Slow push-in. Camera: high 3/4 close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: progress. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** high 3/4 close-up
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** progress
- **Action:** Slow push-in

Beat 158 (8:33, ~4.1s)

[Script Segment] "Ultra-high molecular weight polyethylene, a plastic so light it floats on water,"

> **Image Prompt:** A thin white UHMWPE composite plate floating on the surface of dark water in a glass tank, gentle ripples. Plate bobs gently on the water. Camera: low side close-up at water level. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: surprising, light. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side close-up at water level
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** surprising, light
- **Action:** Plate bobs gently on the water

Beat 159 (8:37, ~2.8s)

[Script Segment] "yet in layered form even stronger than Kevlar."

> **Image Prompt:** Macro of stacked white polyethylene sheets pressed together into a dense layered block beside golden Kevlar fabric. Slow pan from Kevlar to polyethylene. Camera: macro side close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: advanced. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp

> specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro side close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** advanced
- **Action:** Slow pan from Kevlar to polyethylene

Beat 160 (8:40, ~3.8s)

[Script Segment] "Helmets made from it are lighter, and they stop even more."

> **Image Prompt:** A sleek modern matte-grey polyethylene combat helmet resting on dark wood, a flattened fragment beside it. Slow orbit. Camera: eye-level 3/4 medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Mood: confident. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level 3/4 medium close-up
- **Lighting:** single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges
- **Mood:** confident
- **Action:** Slow orbit

Beat 161 (8:44, ~4.1s)

[Script Segment] "Today's combat helmet carries rails, night vision mounts, communication systems, and sensors."

> **Image Prompt:** A fully equipped modern combat helmet with side rails, front night-vision mount, attached goggles, light and headset on a dark stand. Slow orbit revealing all attachments. Camera: low-angle 3/4 medium close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: high-tech, powerful. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle 3/4 medium close-up
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** high-tech, powerful
- **Action:** Slow orbit revealing all attachments

Beat 162 (8:48, ~3.4s)

[Script Segment] "It looks nothing like a copper cap from ancient Sumer."

> **Image Prompt:** A modern equipped combat helmet and a dented copper Sumerian helmet side by side on a dark table. Rack focus from modern to ancient. Camera: low side angle, shallow depth of field. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: contrast, awe. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular

> highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle, shallow depth of field
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** contrast, awe
- **Action:** Rack focus from modern to ancient

Beat 163 (8:52, ~4.8s)

[Script Segment] "From copper to bronze, bronze to iron, iron to steel, and steel to fiber,"

> **Image Prompt:** A long dark table with a chronological line of helmets from copper to bronze, iron, steel and composite, each lit in turn. Lights switch on one by one down the line. Camera: low side angle, deep perspective. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: epic, summarizing. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side angle, deep perspective
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** epic, summarizing
- **Action:** Lights switch on one by one down the line

Beat 164 (8:56, ~3.8s)

[Script Segment] "each step began with a wound the last helmet couldn't prevent."

> **Image Prompt:** Close-up row of damaged helmets: a dented copper cap, a split spangenhelm, a punctured Pickelhaube, a dented M1. Slow lateral slide across the damage. Camera: low side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: sober, meaningful. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low side close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** sober, meaningful
- **Action:** Slow lateral slide across the damage

Beat 165 (9:00, ~2.8s)

[Script Segment] "But the logic behind it has never changed."

> **Image Prompt:** A single modern helmet on a dark pedestal, the faint ghostly outlines of older helmets layered behind it in the haze. Ghost outlines fade in and out. Camera: eye-level medium shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Mood: reflective. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** eye-level medium shot
- **Lighting:** soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow
- **Mood:** reflective
- **Action:** Ghost outlines fade in and out

Beat 166 (9:03, ~3.4s)

[Script Segment] "Every curve, every layer, and every pad is there because,"

> **Image Prompt:** Slow macro details of a modern helmet: the curve of the shell, the layered composite edge, an inner foam pad. Slow continuous glide across details. Camera: macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Mood: appreciative. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** macro close-up
- **Lighting:** low raking side light from the right, long soft shadows, specular glints along edges
- **Mood:** appreciative
- **Action:** Slow continuous glide across details

Beat 167 (9:06, ~3.4s)

[Script Segment] "at some point in history, a helmet without it failed."

> **Image Prompt:** The entire chronological lineup of helmets on a long dark table, lights slowly dimming one by one until only the modern helmet remains lit. Lights fade to black leaving the last helmet. Camera: low-angle wide shot, deep perspective. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Mood: resolved, haunting. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, desaturated palette of charcoal, graphite, worn brown wood, aged steel and dull bronze with warm brass accents, slight cool green-grey in the shadows, faint atmospheric haze, crisp specular highlights, extremely high surface detail (scratches, tool marks, oxidation, wood grain), deep dark negative space, no people, no text, no watermark, 16:9.

- **Camera Angle:** low-angle wide shot, deep perspective
- **Lighting:** narrow overhead spotlight forming a pool of light on the table, everything else falling into black
- **Mood:** resolved, haunting
- **Action:** Lights fade to black leaving the last helmet

2. Video Prompts (167 beats)

Use the matching beat image as the start frame. Each clip is generated at 5 seconds and trimmed to the beat length shown.

Beat 1 (0:00, trim to ~3.8s)

[Script Segment] "Nearly five thousand years separate a dented cap of hammered copper"

> **Video Prompt:** Start frame: A battered, greenish hammered-copper Sumerian helmet sits alone on a dark worn wooden table, dents and verdigris across its dome. Camera and subject motion: Slow push-in toward the dented crown, over the full clip. Framing: high 3/4 angle close-up, shallow depth of field. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: ancient, quiet, reverent. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 2 (0:03, trim to ~2.1s)

[Script Segment] "from the helmet soldiers wear today."

> **Video Prompt:** Start frame: A modern matte-tan composite combat helmet with side rails and a night-vision mount sits on a dark worn wooden table, a dented hammered-copper helmet blurred visible in the far background. Camera and subject motion: Rack focus from the blurred copper helmet to the sharp modern helmet, over the full clip. Framing: eye-level medium close-up, shallow depth of field. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: contrast, quiet awe. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 3 (0:05, trim to ~3.8s)

[Script Segment] "Every era added something new. A tougher metal. A smarter shape."

> **Video Prompt:** Start frame: A long dark wooden table holds a chronological row of helmets fading into darkness: copper, bronze Corinthian, iron Roman, medieval great helm, WWI steel, modern composite, each in its own soft pool of light. Camera and subject motion: Slow lateral slide along the row of helmets, over the full clip. Framing: low side angle along the table, deep perspective, shallow depth of field. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: epic, museum-like. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 4 (0:09, trim to ~2.8s)

[Script Segment] "A better way to soak up a blow."

> **Video Prompt:** Start frame: Cutaway view of a modern combat helmet resting on a dark table, revealing layered shell, foam pads and inner lining in cross-section. Camera and subject motion: Slow orbit around the cutaway edge, over the full clip. Framing: macro close-up on the cross-section. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: technical, curious. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 5 (0:12, trim to ~3.8s)

[Script Segment] "And every one of those changes happened for the same reason."

> **Video Prompt:** Start frame: A row of historic helmets on a dark table seen from above, each placed on a small worn wooden block, faint dust drifting in the air. Camera and subject motion: Slow overhead crane down toward the row, over the full clip. Framing: top-down high angle, wide. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: contemplative. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 6 (0:16, trim to ~2.8s)

[Script Segment] "The helmet before it had let something through."

> **Video Prompt:** Start frame: Close-up of an ancient bronze helmet with a deep split crack and a punctured hole through its side, resting on dark wood, small metal shards beside it. Camera and subject motion: Slow push-in toward the hole, over the full clip. Framing: macro close-up, very shallow depth of field. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: grim, revealing. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 7 (0:18, trim to ~3.8s)

[Script Segment] "To follow that path, our team spent months digging through records"

> **Video Prompt:** Start frame: A dark archive desk scattered with aged parchment sketches of helmets, an open leather-bound book, brass magnifying glass and a single candle. Camera and subject motion: Slow glide across the papers, over the full clip. Framing: high 3/4 angle tabletop close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion:

warm firelight flickers gently across the metal and tiny embers drift upward. Mood: scholarly, intimate. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 8 (0:22, trim to ~3.1s)

[Script Segment] "and rebuilding each helmet in 3D, piece by piece."

> **Video Prompt:** Start frame: A medieval steel helmet assembling itself in mid-air above a dark table, its individual plates and rivets floating into place piece by piece, exploded-view style. Camera and subject motion: Parts drift together and lock into place, over the full clip. Framing: eye-level medium shot, shallow depth of field. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: precise, satisfying. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 9 (0:25, trim to ~2.8s)

[Script Segment] "It starts in ancient Mesopotamia, around 2500 BC."

> **Video Prompt:** Start frame: Ancient Mesopotamian mud-brick ziggurat silhouetted at dusk under a hazy amber sky, dust in the air, a copper helmet resting on a mud-brick ledge in the foreground. Camera and subject motion: Slow push past the helmet toward the ziggurat, over the full clip. Framing: low-angle wide establishing shot, foreground helmet out of focus. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: ancient, mysterious. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 10 (0:28, trim to ~3.8s)

[Script Segment] "Sumerian soldiers marching in tight formations wore helmets of beaten copper"

> **Video Prompt:** Start frame: Rows of identical hammered-copper Sumerian helmets lined up in tight formation on a dark wooden table, like an army of empty helmets, wooden-shafted spears behind them. Camera and subject motion: Slow lateral track along the ranks, over the full clip. Framing: low side angle, deep perspective. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: disciplined, ancient. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black,

> desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 11 (0:32, trim to ~2.8s)

[Script Segment] "over padded leather caps. The idea was simple."

> **Video Prompt:** Start frame: A worn padded leather cap beside a hammered-copper helmet on dark wood, stitching and cracked leather visible, the helmet tilted to show the cap fits inside. Camera and subject motion: Helmet slowly lowers over the leather cap, over the full clip. Framing: macro 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: simple, tactile. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 12 (0:35, trim to ~3.1s)

[Script Segment] "Put something hard between the skull and the weapon."

> **Video Prompt:** Start frame: A bronze-age stone mace head resting against the side of a copper helmet on a dark table, the helmet's surface dented where the mace touches. Camera and subject motion: Slow push-in on the point of contact, over the full clip. Framing: extreme close-up, shallow depth of field. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: tense, primal. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 13 (0:38, trim to ~2.8s)

[Script Segment] "For rulers, the same idea became a symbol."

> **Video Prompt:** Start frame: An ornate golden Sumerian ceremonial helmet on a black velvet museum plinth, gleaming softly in darkness. Camera and subject motion: Slow orbit around the plinth, over the full clip. Framing: low 3/4 angle medium shot. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: regal, reverent. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 14 (0:41, trim to ~3.8s)

[Script Segment] "One Sumerian ruler was buried with a helmet of solid gold,"

> **Video Prompt:** Start frame: A golden Sumerian helmet half-buried in dry earth inside a dim ancient tomb chamber, dust particles floating in a single shaft of light. Camera and subject motion: Dust drifts through the light shaft as the camera descends, over the full clip. Framing: high angle looking down into the tomb. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: sacred, hidden. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 15 (0:44, trim to ~3.1s)

[Script Segment] "shaped to imitate hair tied up in a knot."

> **Video Prompt:** Start frame: Extreme detail of a golden Sumerian helmet's surface, finely engraved wavy hair strands and a tied knot at the back. Camera and subject motion: Slow pan across the engraved hair, over the full clip. Framing: macro close-up, razor-thin depth of field. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: intricate, admiring. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 16 (0:47, trim to ~4.5s)

[Script Segment] "It was never meant to be hit. It was meant to be seen."

> **Video Prompt:** Start frame: A golden Sumerian helmet behind museum glass, warm reflections on the glass, surrounding gallery in deep darkness. Camera and subject motion: Slow pull-back revealing the glass case, over the full clip. Framing: eye-level medium shot. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: majestic, still. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 17 (0:52, trim to ~2.8s)

[Script Segment] "But copper had a weakness. It was soft."

> **Video Prompt:** Start frame: A copper helmet on a dark table with a fresh deep dent in its crown, a few metal flakes beside it. Camera and subject motion: Camera holds while a small dust puff settles from the dent, over the full clip. Framing: macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: vulnerable. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive

> Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 18 (0:55, trim to ~4.8s)

[Script Segment] "A heavy strike could dent it deep enough to injure the man beneath it."

> **Video Prompt:** Start frame: Cross-section cutaway of a copper helmet pressed inward by a dent, the deformed metal pushing into the padded cap beneath it, on a dark table. Camera and subject motion: Dent slowly deepens in slow motion, over the full clip. Framing: side-on cutaway close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: tense, technical. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 19 (1:00, trim to ~2.4s)

[Script Segment] "The answer arrived with the Bronze Age."

> **Video Prompt:** Start frame: A glowing crucible of molten bronze inside a dark ancient workshop, sparks rising, stone tools around it. Camera and subject motion: Molten metal ripples as sparks lift, over the full clip. Framing: low angle close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: transformative. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 20 (1:02, trim to ~3.1s)

[Script Segment] "By mixing copper with a small amount of tin,"

> **Video Prompt:** Start frame: Two small piles on a dark wooden table, reddish copper nuggets and silvery tin ingots, beside a clay crucible. Camera and subject motion: Tin ingot slowly slides toward the copper, over the full clip. Framing: high 3/4 tabletop close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: elemental, curious. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 21 (1:05, trim to ~3.4s)

[Script Segment] "metalworkers created an alloy far harder than either metal alone."

> **Video Prompt:** Start frame: A freshly cast golden-brown bronze ingot cooling on a stone slab, faint heat shimmer above it, dark workshop around. Camera and subject motion: Heat shimmer rises and fades, over the full clip. Framing: macro close-up, shallow depth of field. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: discovery. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 22 (1:08, trim to ~2.1s)

[Script Segment] "Bronze held its shape, resisted cutting,"

> **Video Prompt:** Start frame: A bronze helmet on dark wood with a bronze blade resting against it, only a faint scratch left on the helmet's surface. Camera and subject motion: Slow push-in on the faint scratch, over the full clip. Framing: extreme close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: resilient. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 23 (1:11, trim to ~4.1s)

[Script Segment] "and could be polished to a shine that unsettled anyone facing it."

> **Video Prompt:** Start frame: A highly polished bronze Greek helmet glinting in darkness, a sharp specular flare rolling across its dome. Camera and subject motion: Light flare glides across the polished surface, over the full clip. Framing: low-angle close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: intimidating, striking. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 24 (1:15, trim to ~4.5s)

[Script Segment] "By the 7th century BC, Greek armorers had pushed bronze to its limit."

> **Video Prompt:** Start frame: Dim ancient Greek armorer's workshop, bronze sheets, hammers and anvils on a worn bench, glowing coals in the background. Camera and subject motion: Slow glide across the workbench, over the full clip. Framing: high 3/4 angle medium shot. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: craft, history. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff

> into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 25 (1:19, trim to ~1.7s)

[Script Segment] "They created the Corinthian helmet."

> **Video Prompt:** Start frame: A gleaming bronze Corinthian helmet with almond eye openings and a long nose guard, displayed on a dark wooden stand. Camera and subject motion: Slow reveal as the camera rises to eye level, over the full clip. Framing: eye-level frontal medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: iconic, heroic. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 26 (1:21, trim to ~4.8s)

[Script Segment] "Hammered from a single sheet of metal, it wrapped the entire head and face,"

> **Video Prompt:** Start frame: A flat bronze sheet on an anvil transforming into a Corinthian helmet shape, hammer marks visible across the curved metal. Camera and subject motion: Bronze sheet curves and forms into the helmet, over the full clip. Framing: side 3/4 close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: craftsmanship. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 27 (1:26, trim to ~3.1s)

[Script Segment] "leaving only narrow openings for the eyes and mouth."

> **Video Prompt:** Start frame: Extreme close-up of a Corinthian helmet's narrow eye slits and mouth gap, darkness inside the openings. Camera and subject motion: Slow push into the eye slit, over the full clip. Framing: frontal macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: mysterious, claustrophobic. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 28 (1:29, trim to ~1.7s)

[Script Segment] "Making one took enormous skill."

> **Video Prompt:** Start frame: Weathered bronze-working tools laid out on dark wood: small hammers, stakes and a curved anvil horn beside a half-finished Corinthian helmet. Camera and subject motion:

> Slow pan along the tools, over the full clip. Framing: top-down tabletop shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: respectful, craft. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 29 (1:31, trim to ~3.8s)

[Script Segment] "The smith had to stretch the bronze thin enough to wear,"

> **Video Prompt:** Start frame: A hammer striking a bronze helmet shell on an anvil horn, the metal visibly thinning, tiny sparks and dust. Camera and subject motion: Hammer strikes in slow motion, over the full clip. Framing: low side close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: labor, focus. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 30 (1:34, trim to ~4.5s)

[Script Segment] "yet keep it thick across the brow and crown, where blows landed most."

> **Video Prompt:** Start frame: Cutaway cross-section of a Corinthian helmet on a dark table showing thicker bronze at the brow and crown and thinner walls at the sides. Camera and subject motion: Slow orbit around the cross-section, over the full clip. Framing: side-on macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: technical, insightful. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 31 (1:39, trim to ~4.1s)

[Script Segment] "A single mistake could tear the sheet and ruin weeks of work."

> **Video Prompt:** Start frame: A torn, split bronze helmet shell discarded on a dark anvil, jagged tear running through the metal. Camera and subject motion: Slow push-in on the torn edge, over the full clip. Framing: macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: frustration, fragility. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-

> black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 32 (1:43, trim to ~3.4s)

[Script Segment] "It was superb protection. And that was exactly the problem."

> **Video Prompt:** Start frame: A Corinthian helmet sitting on a dark stand, one half lit and one half swallowed by darkness. Camera and subject motion: Light slowly dims across the helmet's face, over the full clip. Framing: eye-level frontal close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: ominous turn. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 33 (1:46, trim to ~3.4s)

[Script Segment] "A soldier inside a Corinthian helmet could barely hear orders"

> **Video Prompt:** Start frame: View from inside a Corinthian helmet looking out through narrow eye slits at a blurred ancient battlefield of spears and dust. Camera and subject motion: Muffled, slightly unsteady drift, over the full clip. Framing: first-person POV through the eye slits. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: claustrophobic, isolated. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 34 (1:50, trim to ~2.8s)

[Script Segment] "and could see almost nothing to his sides."

> **Video Prompt:** Start frame: POV through Corinthian helmet eye slits, the edges of the frame blocked by dark bronze, only a narrow strip of a dusty battlefield visible ahead. Camera and subject motion: Slow head-turn pan revealing only bronze at the sides, over the full clip. Framing: first-person POV. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: tense, blind. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 35 (1:53, trim to ~3.8s)

[Script Segment] "So over the next few centuries, Greek designs slowly opened up."

> **Video Prompt:** Start frame: Three Greek bronze helmets lined up left to right on dark wood: a closed Corinthian, a Chalcidian with ear openings, an open-faced Attic helmet. Camera and subject motion: Slow lateral slide from closed to open designs, over the full clip. Framing: low side angle, shallow depth

> of field. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: evolution, progress. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 36 (1:56, trim to ~4.1s)

[Script Segment] "Cheek pieces became hinged. Ear openings appeared. Protection was traded for awareness."

> **Video Prompt:** Start frame: Close-up of an Attic Greek bronze helmet with hinged cheek pieces swinging open on small pins, ear cutouts visible. Camera and subject motion: Cheek piece slowly swings open on its hinge, over the full clip. Framing: macro 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: clever, balanced. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 37 (2:01, trim to ~3.8s)

[Script Segment] "Then came Rome. And Rome faced a different problem entirely. Scale."

> **Video Prompt:** Start frame: Hundreds of identical Roman helmets arranged in a vast grid on dark floor stretching into darkness. Camera and subject motion: Slow crane up revealing the endless grid, over the full clip. Framing: high-angle wide shot. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: massive, imperial. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 38 (2:04, trim to ~3.8s)

[Script Segment] "Hand-shaping a full-face helmet took a skilled craftsman days of work."

> **Video Prompt:** Start frame: A lone half-finished bronze helmet on a cluttered dark workbench beside a burned-down candle and scattered tools. Camera and subject motion: Candle flame flickers as the camera holds, over the full clip. Framing: high 3/4 tabletop close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: slow, painstaking. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff

> into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 39 (2:08, trim to ~3.1s)

[Script Segment] "Rome needed to equip hundreds of thousands of men."

> **Video Prompt:** Start frame: Endless rows of Roman shields, spears and helmets on wooden racks inside a dark stone armory. Camera and subject motion: Slow push down the central aisle, over the full clip. Framing: low-angle one-point perspective. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: overwhelming scale. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 40 (2:11, trim to ~4.5s)

[Script Segment] "So its legions adopted a simpler design borrowed from the Celts, the Montefortino."

> **Video Prompt:** Start frame: A plain bronze Montefortino helmet with a top knob and small neck guard on a dark wooden stand. Camera and subject motion: Slow orbit around the helmet, over the full clip. Framing: eye-level 3/4 medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: practical, sturdy. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 41 (2:16, trim to ~4.1s)

[Script Segment] "A plain rounded bowl with a small neck guard and cheek pieces."

> **Video Prompt:** Start frame: Exploded view of a Montefortino helmet floating over dark wood: rounded bronze bowl, separate cheek pieces and short neck guard. Camera and subject motion: Parts separate slightly then hover, over the full clip. Framing: side-on medium shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: clear, technical. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 42 (2:20, trim to ~2.1s)

[Script Segment] "Fast to make. Easy to repair."

> **Video Prompt:** Start frame: A row of identical Montefortino helmets on a workshop bench, one being patched with a small riveted bronze plate. Camera and subject motion: Slow slide along the identical helmets, over the full clip. Framing: low side angle. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: efficient. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 43 (2:22, trim to ~3.1s)

[Script Segment] "These helmets were handed down from soldier to soldier,"

> **Video Prompt:** Start frame: Three worn bronze Montefortino helmets of increasing age lined up on dark wood, scratches and green patina deepening from one to the next. Camera and subject motion: Slow lateral slide from the newest to the oldest helmet, over the full clip. Framing: eye-level close-up, extreme shallow depth of field. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: legacy, continuity. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 44 (2:25, trim to ~4.5s)

[Script Segment] "and some survive today with several different owners' names punched into the metal."

> **Video Prompt:** Start frame: Extreme close-up of dotted punched Latin letters along the neck guard of an ancient bronze helmet, green patina in the grooves. Camera and subject motion: Slow pan along the punched letters, over the full clip. Framing: macro close-up, razor-thin depth of field. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: personal, haunting. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 45 (2:29, trim to ~3.1s)

[Script Segment] "Over time, Roman workshops shifted from bronze to iron."

> **Video Prompt:** Start frame: A bronze helmet and a dark iron helmet side by side on a forge bench, glowing coals behind. Camera and subject motion: Rack focus from bronze to iron, over the full clip. Framing: low side close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: transition. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond

> what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 46 (2:33, trim to ~2.4s)

[Script Segment] "Iron was cheaper and far more plentiful."

> **Video Prompt:** Start frame: A heap of raw iron ore and rough iron blooms piled on a dark workshop floor, faint glow from a furnace. Camera and subject motion: Slow push-in on the ore pile, over the full clip. Framing: high-angle close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: abundant, raw. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 47 (2:35, trim to ~2.8s)

[Script Segment] "And with it came the Imperial Gallic helmet,"

> **Video Prompt:** Start frame: A polished iron Roman Imperial Gallic helmet with brass decorations, brow ridge and wide neck guard on a dark stand. Camera and subject motion: Slow reveal rising from below, over the full clip. Framing: low-angle 3/4 medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: powerful, imperial. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 48 (2:38, trim to ~3.1s)

[Script Segment] "with a reinforced brow ridge to stop downward blows"

> **Video Prompt:** Start frame: Close-up of the raised reinforcing brow ridge across the front of an iron Roman helmet, a gladius edge resting on it. Camera and subject motion: Blade slowly slides off the ridge, over the full clip. Framing: macro frontal close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: protective, smart. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 49 (2:41, trim to ~3.8s)

[Script Segment] "and a wide flared guard protecting the back of the neck."

> **Video Prompt:** Start frame: Rear view of an iron Roman Imperial Gallic helmet showing its wide flared neck guard over a dark stand. Camera and subject motion: Slow orbit to the back, over the full clip. Framing: low rear 3/4 angle. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: solid, guarding. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 50 (2:45, trim to ~3.1s)

[Script Segment] "When the Western Empire collapsed, so did its workshops."

> **Video Prompt:** Start frame: An abandoned Roman armory in ruins, collapsed roof beams, rusted helmets scattered in dust and rubble, pale light through a broken roof. Camera and subject motion: Dust drifts down through light rays, over the full clip. Framing: high-angle wide shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: decline, melancholic. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 51 (2:48, trim to ~4.8s)

[Script Segment] "Without large-scale industry, smiths turned to a design that needed less skill, the spangenhelm."

> **Video Prompt:** Start frame: An early medieval spangenhelm with riveted iron frame strips and plates on a dark wooden table. Camera and subject motion: Slow push-in, over the full clip. Framing: eye-level 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: rugged, makeshift. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 52 (2:53, trim to ~1.7s)

[Script Segment] "Instead of one solid bowl,"

> **Video Prompt:** Start frame: A solid one-piece iron helmet bowl beside a pile of separate iron strips and plates on dark wood. Camera and subject motion: Camera slides from the solid bowl to the scattered parts, over the full clip. Framing: high 3/4 tabletop shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: comparison. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action.

> Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 53 (2:54, trim to ~4.1s)

[Script Segment] "it used a frame of iron strips with plates riveted between them."

> **Video Prompt:** Start frame: Exploded view of a spangenhelm floating above dark wood: iron frame strips, triangular plates and rivets assembling together. Camera and subject motion: Rivets press in as plates lock into the frame, over the full clip. Framing: side-on medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: mechanical, clear. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 54 (2:58, trim to ~4.1s)

[Script Segment] "It was easy to build. But every seam was a weak point."

> **Video Prompt:** Start frame: Extreme close-up of a riveted seam on a spangenhelm, small gaps between the plates and the frame. Camera and subject motion: Slow track along the seam, over the full clip. Framing: macro close-up, razor-thin depth of field. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: suspicious, fragile. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 55 (3:03, trim to ~4.1s)

[Script Segment] "A hard enough blow could split a joint and drive straight through."

> **Video Prompt:** Start frame: A spangenhelm with one riveted seam burst open, a plate bent inward and broken rivets scattered on dark wood. Camera and subject motion: Broken rivet rolls to a stop, over the full clip. Framing: low macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: violent aftermath. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 56 (3:07, trim to ~1.4s)

[Script Segment] "By the 11th century,"

> **Video Prompt:** Start frame: A medieval forge interior at night, glowing furnace, hammers hanging on stone wall, iron helmets cooling on a bench. Camera and subject motion: Slow push toward the glowing furnace, over the full clip. Framing: wide low angle. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: medieval, atmospheric. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 57 (3:08, trim to ~4.8s)

[Script Segment] "smiths had relearned how to raise a helmet from a single piece of iron."

> **Video Prompt:** Start frame: A single glowing iron disc being hammered over a rounded stake into a conical helmet shape, sparks flying in a dark forge. Camera and subject motion: Hammer strikes in slow motion as the metal curves, over the full clip. Framing: low side close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: mastery. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 58 (3:13, trim to ~4.5s)

[Script Segment] "The result was the Norman nasal helmet. A conical shell that deflected blows,"

> **Video Prompt:** Start frame: A conical Norman nasal helmet on a dark stand, a sword blade sliding off its sloped surface. Camera and subject motion: Blade glances off the slope, over the full clip. Framing: eye-level 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: sturdy, clever. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 59 (3:17, trim to ~3.1s)

[Script Segment] "with one narrow bar running down over the nose."

> **Video Prompt:** Start frame: Frontal close-up of the narrow iron nasal bar on a Norman helmet, tool marks and rust spots visible. Camera and subject motion: Slow tilt down along the bar, over the full clip. Framing: frontal macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: austere. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black,

> desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 60 (3:21, trim to ~3.1s)

[Script Segment] "Yet the rest of the face remained completely exposed."

> **Video Prompt:** Start frame: A Norman nasal helmet on a featureless matte-grey museum mannequin head, the face area left bare except the thin nose bar. Camera and subject motion: Slow push-in on the exposed face area, over the full clip. Framing: frontal eye-level close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: vulnerable. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 61 (3:24, trim to ~4.1s)

[Script Segment] "And on medieval battlefields, arrows and blades went looking for exactly that."

> **Video Prompt:** Start frame: Medieval arrows with bodkin heads stuck in dark muddy ground beside a fallen Norman helmet, drifting smoke. Camera and subject motion: Smoke drifts as the camera lowers, over the full clip. Framing: low-angle ground-level shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: grim, dangerous. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 62 (3:28, trim to ~2.1s)

[Script Segment] "So armorers decided to cover everything."

> **Video Prompt:** Start frame: A medieval armorer's bench with large curved steel plates laid out in darkness, a hammer resting on top. Camera and subject motion: Slow overhead glide, over the full clip. Framing: top-down tabletop shot. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: determined. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 63 (3:30, trim to ~3.1s)

[Script Segment] "In the late 12th century, the great helm appeared."

> **Video Prompt:** Start frame: A flat-topped steel medieval great helm with narrow eye slits and breathing holes on a dark stand. Camera and subject motion: Slow dramatic reveal from darkness as light rises,

over the full clip. Framing: low-angle frontal medium close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: imposing, iconic. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 64 (3:33, trim to ~3.1s)

[Script Segment] "A flat-topped steel cylinder that enclosed the entire head."

> **Video Prompt:** Start frame: Side profile of a medieval great helm showing its cylindrical shape and flat top plate, rivets along the seams. Camera and subject motion: Slow orbit to profile, over the full clip. Framing: eye-level side shot. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: bold, enclosed. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 65 (3:36, trim to ~4.5s)

[Script Segment] "For the first time since the Greeks, a soldier's face vanished behind metal."

> **Video Prompt:** Start frame: A bronze Corinthian helmet and a steel great helm facing each other on a dark table, both with dark eye slits. Camera and subject motion: Rack focus from the Corinthian to the great helm, over the full clip. Framing: low side angle, shallow depth of field. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: echo of history. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 66 (3:41, trim to ~3.8s)

[Script Segment] "Knights began painting coats of arms on their shields and surcoats,"

> **Video Prompt:** Start frame: A medieval heater shield with a freshly painted heraldic lion on a dark workbench, paint brushes and pigment pots beside it. Camera and subject motion: Brush slowly finishes a stroke, over the full clip. Framing: high 3/4 close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: identity, color. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 67 (3:44, trim to ~2.1s)

[Script Segment] "simply so they could be recognized."

> **Video Prompt:** Start frame: Several medieval shields with distinct painted coats of arms leaning in a row against a dark stone wall, each beneath a great helm. Camera and subject motion: Slow lateral slide along the shields, over the full clip. Framing: eye-level medium shot. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: pageantry. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 68 (3:46, trim to ~2.8s)

[Script Segment] "But the flat top had a fatal flaw."

> **Video Prompt:** Start frame: Top-down view of a great helm's flat crown plate, scratches and a dent in the middle. Camera and subject motion: Slow descent toward the dent, over the full clip. Framing: top-down close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: ominous. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 69 (3:49, trim to ~2.1s)

[Script Segment] "It met every overhead strike head-on,"

> **Video Prompt:** Start frame: A heavy medieval sword coming straight down onto the flat top of a great helm on a dark stand, frozen at the moment of impact, sparks erupting. Camera and subject motion: Slow-motion impact with sparks, over the full clip. Framing: low side angle close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: violent, tense. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 70 (3:51, trim to ~3.1s)

[Script Segment] "absorbing the full force instead of turning it aside."

> **Video Prompt:** Start frame: Cutaway view of a great helm's flat top buckling straight down under a blade, the force lines visible as a faint glow pushing inward. Camera and subject motion: Metal flexes downward in slow motion, over the full clip. Framing: side-on cutaway close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: technical, alarming. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden

> cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 71 (3:54, trim to ~2.8s)

[Script Segment] "So armorers raised the crown into a point."

> **Video Prompt:** Start frame: A steel great helm crown being reshaped on an anvil, its flat top rising into a point under the hammer. Camera and subject motion: Crown slowly rises into a cone, over the full clip. Framing: low side close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: inventive. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 72 (3:57, trim to ~4.5s)

[Script Segment] "This was the sugarloaf helm, and it did what flat steel could not."

> **Video Prompt:** Start frame: A medieval sugarloaf helm with a pointed crown on a dark stand, polished steel catching a rim highlight. Camera and subject motion: Slow orbit revealing the pointed crown, over the full clip. Framing: low-angle 3/4 medium close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: triumphant. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 73 (4:02, trim to ~1.7s)

[Script Segment] "It made blades slide off."

> **Video Prompt:** Start frame: A sword edge glancing off the pointed sugarloaf crown, a streak of sparks trailing along the curve. Camera and subject motion: Blade slides off in slow motion, over the full clip. Framing: side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: satisfying. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 74 (4:03, trim to ~3.4s)

[Script Segment] "Underneath all that steel, knights wore something just as important."

> **Video Prompt:** Start frame: A great helm lifted slightly off a dark stand, revealing shadowed shapes underneath. Camera and subject motion: Helm slowly rises to reveal what is beneath, over the full clip. Framing: eye-level close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: curious, hidden. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 75 (4:07, trim to ~3.1s)

[Script Segment] "A padded arming cap and a hood of mail."

> **Video Prompt:** Start frame: A quilted linen arming cap and a chainmail coif laid side by side on dark wood, every ring and stitch visible. Camera and subject motion: Slow push across the textures, over the full clip. Framing: high 3/4 macro close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: tactile, detailed. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 76 (4:10, trim to ~3.4s)

[Script Segment] "The metal stopped the edge. The padding softened the shock."

> **Video Prompt:** Start frame: Cutaway of a great helm worn over a mail coif and padded cap on a mannequin head, layers visible in cross-section. Camera and subject motion: Slow pan across the layers from outside in, over the full clip. Framing: side-on cutaway close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: insightful. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 77 (4:13, trim to ~2.4s)

[Script Segment] "It was a lesson armies would forget,"

> **Video Prompt:** Start frame: A dusty padded arming cap abandoned on a dark shelf, cobwebs and dust settling over it. Camera and subject motion: Dust slowly drifts down, over the full clip. Framing: eye-level close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: forgotten, melancholic. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn

> wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 78 (4:16, trim to ~2.8s)

[Script Segment] "and then have to learn all over again."

> **Video Prompt:** Start frame: A dusty medieval arming cap beside a modern helmet foam pad on a dark table, both lit in the same pool of light. Camera and subject motion: Rack focus from old padding to modern padding, over the full clip. Framing: low side close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: full-circle, reflective. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 79 (4:18, trim to ~2.4s)

[Script Segment] "Vision and airflow were still a struggle."

> **Video Prompt:** Start frame: Extreme close-up of a great helm's tiny breathing holes and narrow eye slit, faint warm breath vapor drifting out. Camera and subject motion: Vapor curls out of the holes, over the full clip. Framing: macro frontal close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: suffocating. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 80 (4:21, trim to ~3.4s)

[Script Segment] "In the 14th century, the bascinet introduced a clever fix."

> **Video Prompt:** Start frame: A 14th-century steel bascinet helmet with a closed visor on a dark stand. Camera and subject motion: Slow push-in, over the full clip. Framing: eye-level 3/4 medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: clever, refined. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 81 (4:24, trim to ~4.1s)

[Script Segment] "A visor mounted on pivots. Raise it to breathe and look around."

> **Video Prompt:** Start frame: Close-up of a bascinet's side pivot pin, the visor slowly lifting upward. Camera and subject motion: Visor rotates upward on its pivot, over the full clip. Framing: macro side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges.

> Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: mechanical, satisfying. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 82 (4:28, trim to ~2.4s)

[Script Segment] "Lower it when the arrows started flying."

> **Video Prompt:** Start frame: A bascinet visor snapping down closed while blurred arrows streak through the dark background. Camera and subject motion: Visor drops shut as arrows fly past, over the full clip. Framing: low-angle close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: urgent. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 83 (4:31, trim to ~3.1s)

[Script Segment] "Some visors were drawn out into a sharp point,"

> **Video Prompt:** Start frame: Side profile of a hounskull bascinet with a long pointed snout-like visor on a dark stand. Camera and subject motion: Slow orbit to the profile, over the full clip. Framing: eye-level side shot. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: strange, menacing. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 84 (4:34, trim to ~2.4s)

[Script Segment] "earning the nickname hounskull, or dog's face."

> **Video Prompt:** Start frame: Frontal view of a pointed hounskull visor looking like a metal dog's muzzle, rows of breathing holes, emerging from darkness. Camera and subject motion: Slow push-in on the snout, over the full clip. Framing: low-angle frontal close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: eerie, memorable. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 85 (4:36, trim to ~4.1s)

[Script Segment] "That beak shape gave lances and arrows nothing flat to bite into."

> **Video Prompt:** Start frame: An arrowhead deflecting off the sloped beak of a hounskull visor, the arrow shaft bending away. Camera and subject motion: Arrow glances off in slow motion, over the full clip. Framing: side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: clever, kinetic. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 86 (4:41, trim to ~4.1s)

[Script Segment] "By the 1400s, helmets like the armet fitted the head so closely"

> **Video Prompt:** Start frame: A 15th-century steel armet helmet with closely shaped cheek plates on a dark stand, polished steel with fine scratches. Camera and subject motion: Slow orbit around the close-fitting shape, over the full clip. Framing: eye-level 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: elegant, refined. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 87 (4:45, trim to ~2.1s)

[Script Segment] "that they moved with the wearer."

> **Video Prompt:** Start frame: An armet on a matte-grey mannequin head turning slowly, its hinged cheek plates fitting tightly to the jaw. Camera and subject motion: Head and helmet rotate together, over the full clip. Framing: eye-level close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: fluid, precise. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 88 (4:47, trim to ~2.4s)

[Script Segment] "Medieval head protection had reached its peak."

> **Video Prompt:** Start frame: A complete polished medieval armet helmet alone on a dark pedestal in a single spotlight, like a museum masterpiece. Camera and subject motion: Slow pull-back, over the full clip. Framing: low-angle medium shot. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: peak, majestic. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing

> beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 89 (4:49, trim to ~2.1s)

[Script Segment] "Then, gunpowder arrived on the battlefield."

> **Video Prompt:** Start frame: A pile of black gunpowder on dark wood, a lit match descending toward it, sparks starting to flare. Camera and subject motion: Powder ignites in a bright flash, over the full clip. Framing: low macro close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: dramatic turning point. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 90 (4:51, trim to ~1.7s)

[Script Segment] "As firearms grew more powerful,"

> **Video Prompt:** Start frame: A flintlock musket resting on a dark wooden table with a lead ball and powder horn beside it. Camera and subject motion: Slow lateral slide along the barrel, over the full clip. Framing: low side angle along the barrel. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: ominous. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 91 (4:53, trim to ~4.8s)

[Script Segment] "armor thick enough to stop a musket ball became too heavy to fight in."

> **Video Prompt:** Start frame: A very thick steel breastplate and helmet on a dark table, a flattened lead musket ball embedded in a shallow dent. Camera and subject motion: Slow push-in on the flattened ball, over the full clip. Framing: macro close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: heavy, burdensome. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 92 (4:58, trim to ~2.1s)

[Script Segment] "Little by little, soldiers abandoned it."

> **Video Prompt:** Start frame: Discarded rusting helmets and plate armor piled in a dim corner of a stone storeroom, dust in the air. Camera and subject motion: Dust drifts in a faint light beam, over the full clip. Framing: high-angle medium shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: abandonment. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 93 (5:00, trim to ~4.8s)

[Script Segment] "By the 18th century, most infantry marched into battle wearing felt, cloth, and leather."

> **Video Prompt:** Start frame: A black felt tricorne hat, a tall cloth shako and a leather cap arranged on a dark wooden table. Camera and subject motion: Slow lateral slide across the hats, over the full clip. Framing: high 3/4 tabletop shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: exposed, era shift. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 94 (5:05, trim to ~1.7s)

[Script Segment] "Helmets survived mostly as decoration."

> **Video Prompt:** Start frame: An ornate brass-crested parade helmet with a horsehair plume on a dark display stand. Camera and subject motion: Slow orbit, over the full clip. Framing: eye-level 3/4 close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: ceremonial. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 95 (5:06, trim to ~2.8s)

[Script Segment] "There were exceptions. Heavy cavalry, like Napoleon's cuirassiers,"

> **Video Prompt:** Start frame: A Napoleonic French cuirassier steel helmet with brass crest and horsehair mane beside a polished steel breastplate on dark wood. Camera and subject motion: Slow push-in, over the full clip. Framing: low-angle 3/4 medium shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: proud, martial. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key

> lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 96 (5:09, trim to ~3.4s)

[Script Segment] "kept their steel helmets and breastplates well into the 1800s."

> **Video Prompt:** Start frame: Close-up of a Napoleonic cuirassier breastplate's polished curve and brass rivets, a helmet softly blurred behind. Camera and subject motion: Rack focus from breastplate to helmet, over the full clip. Framing: macro side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: enduring. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 97 (5:13, trim to ~4.1s)

[Script Segment] "But for the common foot soldier, the helmet had all but disappeared."

> **Video Prompt:** Start frame: An empty wooden helmet stand on a dark table beside a simple cloth infantry cap. Camera and subject motion: Slow push toward the empty stand, over the full clip. Framing: eye-level close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: absence. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 98 (5:17, trim to ~3.8s)

[Script Segment] "Prussia's famous spiked Pickelhaube of 1842 was made of hardened leather."

> **Video Prompt:** Start frame: A black leather Prussian Pickelhaube with brass spike and eagle plate on a dark stand. Camera and subject motion: Slow orbit around the spike, over the full clip. Framing: low-angle 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: iconic, proud. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 99 (5:21, trim to ~3.1s)

[Script Segment] "It looked impressive, but it offered almost no protection."

> **Video Prompt:** Start frame: Cutaway of a Pickelhaube showing thin hardened leather walls, a small metal fragment punched through the side. Camera and subject motion: Slow push-in on the puncture, over the full clip. Framing: side cutaway macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and

> the raking light glints softly along the edges as the view shifts. Mood: ironic, fragile. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 100 (5:24, trim to ~2.8s)

[Script Segment] "For nearly two hundred years, that seemed acceptable."

> **Video Prompt:** Start frame: A row of cloth and leather military caps from different eras on a long dark table, dust drifting. Camera and subject motion: Slow lateral slide along the caps, over the full clip. Framing: low side angle. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: calm before the storm. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 101 (5:26, trim to ~0.7s)

[Script Segment] "Until 1914."

> **Video Prompt:** Start frame: A brass artillery shell standing upright on a dark table in a single harsh spotlight. Camera and subject motion: Hard cut to stillness, over the full clip. Framing: low-angle close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: ominous, abrupt. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 102 (5:27, trim to ~2.8s)

[Script Segment] "The First World War was dominated by artillery."

> **Video Prompt:** Start frame: A muddy WWI battlefield at dusk, row of field artillery guns silhouetted, smoke and haze, no people. Camera and subject motion: Slow push across the gun line, over the full clip. Framing: low-angle wide shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: grim, overwhelming. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 103 (5:30, trim to ~4.8s)

[Script Segment] "Shells burst above the trenches, raining hot metal fragments down on the men below."

> **Video Prompt:** Start frame: An airburst shell exploding above an empty WWI trench at night, glowing jagged metal fragments falling toward sandbags. Camera and subject motion: Fragments rain down in slow motion, over the full clip. Framing: low-angle looking up from the trench. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: terrifying. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 104 (5:35, trim to ~4.8s)

[Script Segment] "A soldier only had to raise his head above the parapet to be struck."

> **Video Prompt:** Start frame: Point of view from inside a WWI trench looking just over sandbags at a smoky no-man's-land, barbed wire silhouettes. Camera and subject motion: Slow rise above the parapet, over the full clip. Framing: first-person POV at sandbag height. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: tense, exposed. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 105 (5:39, trim to ~2.8s)

[Script Segment] "And most of them were wearing fabric caps."

> **Video Prompt:** Start frame: A soft wool WWI-era peaked cloth cap lying on wet sandbags, mud and rain drops. Camera and subject motion: Raindrops hit the cap, over the full clip. Framing: macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: vulnerable, sad. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 106 (5:42, trim to ~4.8s)

[Script Segment] "France reacted first. Its soldiers began receiving steel skullcaps to wear underneath their kepis."

> **Video Prompt:** Start frame: A thin steel skullcap beside a red-and-blue French kepi on a dark table, the cap tilted to show it fits inside. Camera and subject motion: Skullcap slides into the kepi, over the full clip. Framing: high 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and

> specular highlights slide subtly across the metal as the view shifts. Mood: urgent improvisation. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 107 (5:47, trim to ~3.8s)

[Script Segment] "Within months, the army introduced a full steel helmet, the Adrian."

> **Video Prompt:** Start frame: A horizon-blue French Adrian helmet with its distinctive crest ridge and small brim on a dark stand. Camera and subject motion: Slow orbit around the crest, over the full clip. Framing: eye-level 3/4 medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: emblematic. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 108 (5:51, trim to ~4.5s)

[Script Segment] "Britain followed with the Brodie helmet. Its design was brilliant in its simplicity."

> **Video Prompt:** Start frame: A khaki-green British Brodie helmet with wide flat brim on dark wood, simple and clean. Camera and subject motion: Slow crane down from above, over the full clip. Framing: high-angle close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: simple, smart. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 109 (5:55, trim to ~3.4s)

[Script Segment] "It was pressed from a single sheet of manganese steel,"

> **Video Prompt:** Start frame: An industrial press stamping a flat steel sheet into a Brodie helmet shape in a dark factory, sparks and steam. Camera and subject motion: Press slams down in slow motion, over the full clip. Framing: low side medium shot. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: industrial, powerful. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 110 (5:59, trim to ~2.4s)

[Script Segment] "a process fast enough to produce millions."

> **Video Prompt:** Start frame: A conveyor line in a dim factory carrying hundreds of identical Brodie helmets into the distance. Camera and subject motion: Slow track alongside the conveyor, over the full clip. Framing: low side angle, deep perspective. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: mass production. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 111 (6:01, trim to ~4.8s)

[Script Segment] "Its wide, shallow brim shielded the head and shoulders from fragments falling from above."

> **Video Prompt:** Start frame: A Brodie helmet on a mannequin bust in a dark space, glowing metal fragments falling from above and bouncing off the wide brim. Camera and subject motion: Fragments glance off the brim, over the full clip. Framing: high-angle 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: protective, effective. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 112 (6:06, trim to ~3.1s)

[Script Segment] "Germany went further. In 1916, it introduced the Stahlhelm."

> **Video Prompt:** Start frame: A field-grey German M1916 Stahlhelm on a dark stand, emerging from shadow. Camera and subject motion: Slow reveal as light rises, over the full clip. Framing: low-angle frontal close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: imposing. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 113 (6:09, trim to ~4.1s)

[Script Segment] "Made of nickel steel, its deep shape extended down over the ears"

> **Video Prompt:** Start frame: Side profile of a German Stahlhelm showing its deep skirt flaring down over the ear area, ventilation lugs visible. Camera and subject motion: Slow track along the deep skirt, over the full clip. Framing: eye-level side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: robust. Motion: slow, smooth, weighted and

> cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 114 (6:13, trim to ~2.1s)

[Script Segment] "and the back of the neck."

> **Video Prompt:** Start frame: Rear 3/4 view of a German Stahlhelm showing the flared neck protection. Camera and subject motion: Slow orbit to the back, over the full clip. Framing: low rear angle close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: enclosing. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 115 (6:15, trim to ~4.1s)

[Script Segment] "It became one of the most recognizable silhouettes of the twentieth century."

> **Video Prompt:** Start frame: Pure black silhouette of a German Stahlhelm against a softly glowing grey background haze. Camera and subject motion: Slow push-in on the silhouette, over the full clip. Framing: eye-level side shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: iconic, haunting. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 116 (6:19, trim to ~3.1s)

[Script Segment] "Germany even tried to add an extra steel plate"

> **Video Prompt:** Start frame: A thick steel brow plate resting on dark wood beside a Stahlhelm. Camera and subject motion: Slow push across the heavy plate, over the full clip. Framing: high 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: experimental. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 117 (6:23, trim to ~4.8s)

[Script Segment] "that hung from lugs on the front, meant to stop bullets at the brow."

> **Video Prompt:** Start frame: A heavy steel brow plate hooked onto the side lugs of a German Stahlhelm, a flattened bullet stuck in its surface. Camera and subject motion: Slow push-in on the flattened bullet, over the full clip. Framing: frontal macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: tough. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 118 (6:27, trim to ~4.8s)

[Script Segment] "It worked, but it was so heavy that few soldiers wore it for long."

> **Video Prompt:** Start frame: A Stahlhelm with its brow plate sitting on a rusted old balance scale that tips heavily to one side. Camera and subject motion: Scale slowly sinks under the weight, over the full clip. Framing: eye-level medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: burdensome. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 119 (6:32, trim to ~2.4s)

[Script Segment] "Once again, protection had collided with weight."

> **Video Prompt:** Start frame: A medieval great helm and a WWI Stahlhelm with brow plate side by side on a dark table, both heavy and imposing. Camera and subject motion: Slow pull-back revealing both, over the full clip. Framing: low side angle. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: history repeating. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 120 (6:35, trim to ~2.4s)

[Script Segment] "Steel helmets sharply reduced fatal head wounds."

> **Video Prompt:** Start frame: A row of WWI steel helmets on dark wood, Adrian, Brodie and Stahlhelm, each with small dents from fragments. Camera and subject motion: Slow lateral slide along the dented helmets, over the full clip. Framing: low side angle. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: relief, vindication. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact

> still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 121 (6:37, trim to ~2.4s)

[Script Segment] "But they still had a hidden problem."

> **Video Prompt:** Start frame: Inside view of a WWI steel helmet showing a thin leather liner pressed tight against the shell. Camera and subject motion: Slow push into the dark interior, over the full clip. Framing: low-angle interior close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: suspicious. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 122 (6:39, trim to ~3.8s)

[Script Segment] "When a fragment hit, the shell pressed directly against the skull,"

> **Video Prompt:** Start frame: Cutaway of a WWI helmet on a mannequin head, a fragment impact denting the steel straight into the skull area with no gap. Camera and subject motion: Dent pushes inward in slow motion, over the full clip. Framing: side-on cutaway close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: tense, technical. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 123 (6:43, trim to ~3.1s)

[Script Segment] "passing much of the impact straight into the wearer."

> **Video Prompt:** Start frame: Cutaway diagram-like render showing glowing shockwave lines traveling from a helmet dent directly into a mannequin skull. Camera and subject motion: Shockwave pulses inward, over the full clip. Framing: side-on close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: alarming. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 124 (6:46, trim to ~3.8s)

[Script Segment] "In 1941, the United States answered this with the M1 helmet."

> **Video Prompt:** Start frame: An olive-drab US M1 helmet with chinstrap on a dark wooden stand. Camera and subject motion: Slow orbit, over the full clip. Framing: eye-level 3/4 medium close-up.

> Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: confident, iconic. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 125 (6:50, trim to ~3.1s)

[Script Segment] "It used two separate parts. An outer steel shell,"

> **Video Prompt:** Start frame: An M1 helmet's steel shell lifting upward off its inner liner on a dark table, separating into two parts. Camera and subject motion: Shell rises and separates from liner, over the full clip. Framing: eye-level side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: revealing. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 126 (6:53, trim to ~4.1s)

[Script Segment] "and a lighter liner inside it with an adjustable web of straps."

> **Video Prompt:** Start frame: Close-up of an M1 helmet liner's interior showing cotton webbing straps, a sweatband and adjustment buckles. Camera and subject motion: Slow pan across the webbing, over the full clip. Framing: high-angle macro close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: engineered, detailed. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 127 (6:57, trim to ~3.4s)

[Script Segment] "That gap between steel and skull became a crumple zone."

> **Video Prompt:** Start frame: Cutaway of an M1 helmet on a mannequin head showing a clear gap between the steel shell and the head, held by webbing. Camera and subject motion: Gap glows faintly as the camera pushes in, over the full clip. Framing: side-on cutaway close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: insightful. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 128 (7:01, trim to ~4.1s)

[Script Segment] "The shell could take a dent without the dent reaching the head."

> **Video Prompt:** Start frame: Cutaway of an M1 helmet denting inward from a fragment while the webbing gap keeps the dent from touching the mannequin's head. Camera and subject motion: Dent forms in slow motion and stops short, over the full clip. Framing: side-on cutaway close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: relief, satisfying. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 129 (7:05, trim to ~2.1s)

[Script Segment] "Soldiers nicknamed it the steel pot,"

> **Video Prompt:** Start frame: A dented olive-drab M1 helmet upside down on a dark wooden table like a bowl. Camera and subject motion: Slow crane down into the bowl, over the full clip. Framing: high-angle close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: warm, informal. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 130 (7:07, trim to ~3.1s)

[Script Segment] "and they used it as far more than armor."

> **Video Prompt:** Start frame: An M1 helmet surrounded by field items on dark wood: a canteen, folding shovel, mess kit and a bar of soap. Camera and subject motion: Slow overhead glide, over the full clip. Framing: top-down tabletop shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: resourceful. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 131 (7:10, trim to ~3.1s)

[Script Segment] "It became a wash basin, a shovel, a seat,"

> **Video Prompt:** Start frame: An upturned M1 helmet filled with soapy water beside a shaving brush on a wooden crate at dusk. Camera and subject motion: Ripples spread across the water, over the full clip. Framing: low 3/4 close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: human, everyday. Motion: slow, smooth, weighted and

> cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 132 (7:13, trim to ~3.1s)

[Script Segment] "and even a cooking pot over an open fire."

> **Video Prompt:** Start frame: An M1 helmet shell hanging over a small campfire at night, steam rising from water inside. Camera and subject motion: Steam curls upward, embers drift, over the full clip. Framing: low-angle close-up. Lighting: warm flickering orange glow from a forge or flame mixed with cold grey ambient fill. Ambient motion: warm firelight flickers gently across the metal and tiny embers drift upward. Mood: warm, survival. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 133 (7:16, trim to ~4.8s)

[Script Segment] "The M1 served for more than forty years. But steel had reached its limit."

> **Video Prompt:** Start frame: A worn, scratched M1 helmet with faded paint resting alone on a dark shelf, dust settling. Camera and subject motion: Slow push-in on the worn surface, over the full clip. Framing: eye-level close-up. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: aging, end of era. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 134 (7:21, trim to ~4.8s)

[Script Segment] "To make it stronger, you had to make it thicker. And thicker meant heavier."

> **Video Prompt:** Start frame: Three steel helmet cross-sections on dark wood, each thicker than the last, beside an old brass balance scale tipping under the thickest. Camera and subject motion: Scale tips under the heaviest section, over the full clip. Framing: low side close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: dilemma. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 135 (7:26, trim to ~2.1s)

[Script Segment] "The breakthrough came from a laboratory."

> **Video Prompt:** Start frame: A dim 1960s chemistry laboratory, glass beakers, flasks and coiled tubing on a lab bench, a single desk lamp glowing. Camera and subject motion: Slow glide along the bench, over the full clip. Framing: high 3/4 medium shot. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: discovery, hopeful. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 136 (7:28, trim to ~3.4s)

[Script Segment] "In 1965, DuPont chemist Stephanie Kwolek discovered a synthetic fiber"

> **Video Prompt:** Start frame: A glass beaker of cloudy liquid on a lab bench, a thin golden fiber being drawn up out of it, other glassware blurred behind. Camera and subject motion: Fiber slowly lifts from the liquid, over the full clip. Framing: macro close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: breakthrough. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 137 (7:32, trim to ~3.4s)

[Script Segment] "that, weight for weight, was five times stronger than steel."

> **Video Prompt:** Start frame: An antique brass balance with a small coil of golden aramid fiber on one pan and a steel bar on the other, perfectly level. Camera and subject motion: Balance settles level, over the full clip. Framing: eye-level close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: astonishing. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 138 (7:35, trim to ~1.4s)

[Script Segment] "It was called Kevlar."

> **Video Prompt:** Start frame: A spool of golden-yellow Kevlar fiber woven into tight fabric, macro detail of the weave on dark wood. Camera and subject motion: Slow push across the weave, over the full clip. Framing: macro close-up, razor-thin depth of field. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: modern, strong. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting

> consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 139 (7:36, trim to ~3.8s)

[Script Segment] "In the early 1980s, the US Army adopted the PASGT helmet,"

> **Video Prompt:** Start frame: A woodland-camouflage-covered PASGT helmet on a dark stand. Camera and subject motion: Slow orbit, over the full clip. Framing: eye-level 3/4 medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: modern era. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 140 (7:40, trim to ~3.1s)

[Script Segment] "built from layers of Kevlar bonded together with resin."

> **Video Prompt:** Start frame: Exploded view of golden Kevlar fabric layers stacking and fusing together with glossy resin, floating above dark wood. Camera and subject motion: Layers stack and fuse, over the full clip. Framing: side-on close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: engineered. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 141 (7:43, trim to ~4.8s)

[Script Segment] "Instead of resisting a fragment with hard metal, its fibers stretched and caught it,"

> **Video Prompt:** Start frame: Extreme macro of woven Kevlar fibers stretching around a jagged metal fragment, catching it like a net. Camera and subject motion: Fibers stretch in slow motion and hold, over the full clip. Framing: macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: technical, impressive. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 142 (7:48, trim to ~2.4s)

[Script Segment] "spreading the energy across the entire shell."

> **Video Prompt:** Start frame: Cutaway of a Kevlar helmet shell with glowing energy ripples spreading outward from an impact point. Camera and subject motion: Ripples spread across the shell, over the full clip. Framing: side cutaway close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: insightful. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 143 (7:51, trim to ~3.8s)

[Script Segment] "For roughly the same weight as steel, it stopped far more."

> **Video Prompt:** Start frame: An M1 steel helmet and a PASGT Kevlar helmet on opposite pans of an antique brass balance, nearly level. Camera and subject motion: Balance settles near level, over the full clip. Framing: eye-level medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: triumphant. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 144 (7:54, trim to ~1.4s)

[Script Segment] "Its shape looked familiar."

> **Video Prompt:** Start frame: A PASGT helmet on a dark table with its deep sides catching a rim of light. Camera and subject motion: Slow orbit to profile, over the full clip. Framing: eye-level side shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: curious. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 145 (7:56, trim to ~4.1s)

[Script Segment] "The deep sides covering the ears and neck echoed the German Stahlhelm"

> **Video Prompt:** Start frame: Silhouettes of a German Stahlhelm and a US PASGT helmet side by side in profile, near-identical outlines. Camera and subject motion: Silhouettes slide together to overlap, over the full clip. Framing: eye-level side shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: echo, surprising. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal,

> graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 146 (8:00, trim to ~3.1s)

[Script Segment] "so closely that American troops nicknamed it the Fritz."

> **Video Prompt:** Start frame: A PASGT helmet on dark wood with a WWI Stahlhelm softly blurred behind it in the same pose. Camera and subject motion: Rack focus between the two helmets, over the full clip. Framing: low side angle. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: ironic. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 147 (8:03, trim to ~3.4s)

[Script Segment] "Nearly seventy years later, the best answer to falling fragments"

> **Video Prompt:** Start frame: A 1916 Stahlhelm and a 1980s PASGT helmet facing each other on a long dark table, dust drifting between them. Camera and subject motion: Slow lateral slide between them, over the full clip. Framing: low side angle. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: reflective. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 148 (8:06, trim to ~2.4s)

[Script Segment] "still looked like a design from 1916."

> **Video Prompt:** Start frame: Close-up of a worn WWI Stahlhelm's deep skirt edge, chips in the field-grey paint. Camera and subject motion: Slow push-in, over the full clip. Framing: macro side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: timeless. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 149 (8:09, trim to ~2.4s)

[Script Segment] "But modern wars revealed a new threat."

> **Video Prompt:** Start frame: A modern desert-tan combat helmet resting on sandbags at dusk, a faint dust cloud rising in the distance. Camera and subject motion: Dust drifts across the frame, over the full clip. Framing: low-angle close-up. Lighting: soft backlight creating a thin glowing rim around the

> silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: ominous. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 150 (8:11, trim to ~3.8s)

[Script Segment] "In Iraq and Afghanistan, many head injuries came not from penetration,"

> **Video Prompt:** Start frame: An arid rocky desert landscape at dusk with drifting dust, a lone desert-tan helmet lying on rubble in the foreground. Camera and subject motion: Slow push toward the helmet, over the full clip. Framing: low-angle wide shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: harsh. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 151 (8:15, trim to ~4.1s)

[Script Segment] "but from blast and blunt force. The old strap suspension wasn't enough."

> **Video Prompt:** Start frame: Cutaway of an older helmet with strap suspension on a mannequin head, a pressure wave ripple passing through it. Camera and subject motion: Shockwave ripples through the helmet, over the full clip. Framing: side cutaway close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: tense, technical. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 152 (8:19, trim to ~1.4s)

[Script Segment] "The answer was padding."

> **Video Prompt:** Start frame: Several shock-absorbing foam helmet pads laid out on dark wood, varied shapes, hook-and-loop backs. Camera and subject motion: Slow overhead glide, over the full clip. Framing: top-down tabletop shot. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: simple solution. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 153 (8:21, trim to ~3.8s)

[Script Segment] "Newer helmets replaced the web of straps with shock-absorbing foam pads,"

> **Video Prompt:** Start frame: Inside view of a modern combat helmet showing foam pads arranged around the interior where webbing once was. Camera and subject motion: Slow push into the interior, over the full clip. Framing: low-angle interior close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: modern, refined. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 154 (8:24, trim to ~2.1s)

[Script Segment] "spreading every impact across the skull."

> **Video Prompt:** Start frame: Cutaway of a modern padded helmet on a mannequin head, glowing impact energy spreading evenly through the foam pads. Camera and subject motion: Energy diffuses through the pads, over the full clip. Framing: side cutaway close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: reassuring. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 155 (8:26, trim to ~2.8s)

[Script Segment] "Their edges were cut higher around the ears,"

> **Video Prompt:** Start frame: Side profile of a modern high-cut combat helmet with raised edges above the ear area. Camera and subject motion: Slow orbit to profile, over the full clip. Framing: eye-level side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: sleek. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 156 (8:29, trim to ~2.4s)

[Script Segment] "leaving room for radios and hearing protection."

> **Video Prompt:** Start frame: A high-cut helmet on a mannequin head fitted with tactical over-ear headset and boom microphone. Camera and subject motion: Slow push-in on the headset, over the full clip. Framing: eye-level 3/4 close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: technical, modern. Motion:

> slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 157 (8:32, trim to ~1.7s)

[Script Segment] "Then materials moved forward again."

> **Video Prompt:** Start frame: Abstract dark laboratory setting with a sheet of white composite material under a single lamp. Camera and subject motion: Slow push-in, over the full clip. Framing: high 3/4 close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: progress. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 158 (8:33, trim to ~4.1s)

[Script Segment] "Ultra-high molecular weight polyethylene, a plastic so light it floats on water,"

> **Video Prompt:** Start frame: A thin white UHMWPE composite plate floating on the surface of dark water in a glass tank, gentle ripples. Camera and subject motion: Plate bobs gently on the water, over the full clip. Framing: low side close-up at water level. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: surprising, light. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 159 (8:37, trim to ~2.8s)

[Script Segment] "yet in layered form even stronger than Kevlar."

> **Video Prompt:** Start frame: Macro of stacked white polyethylene sheets pressed together into a dense layered block beside golden Kevlar fabric. Camera and subject motion: Slow pan from Kevlar to polyethylene, over the full clip. Framing: macro side close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: advanced. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 160 (8:40, trim to ~3.8s)

[Script Segment] "Helmets made from it are lighter, and they stop even more."

> **Video Prompt:** Start frame: A sleek modern matte-grey polyethylene combat helmet resting on dark wood, a flattened fragment beside it. Camera and subject motion: Slow orbit, over the full clip. Framing: eye-level 3/4 medium close-up. Lighting: single soft key light from upper left, steep falloff into near-black, crisp rim highlights on metal edges. Ambient motion: faint haze drifts in the darkness and specular highlights slide subtly across the metal as the view shifts. Mood: confident. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 161 (8:44, trim to ~4.1s)

[Script Segment] "Today's combat helmet carries rails, night vision mounts, communication systems, and sensors."

> **Video Prompt:** Start frame: A fully equipped modern combat helmet with side rails, front night-vision mount, attached goggles, light and headset on a dark stand. Camera and subject motion: Slow orbit revealing all attachments, over the full clip. Framing: low-angle 3/4 medium close-up. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: high-tech, powerful. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 162 (8:48, trim to ~3.4s)

[Script Segment] "It looks nothing like a copper cap from ancient Sumer."

> **Video Prompt:** Start frame: A modern equipped combat helmet and a dented copper Sumerian helmet side by side on a dark table. Camera and subject motion: Rack focus from modern to ancient, over the full clip. Framing: low side angle, shallow depth of field. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: contrast, awe. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 163 (8:52, trim to ~4.8s)

[Script Segment] "From copper to bronze, bronze to iron, iron to steel, and steel to fiber,"

> **Video Prompt:** Start frame: A long dark table with a chronological line of helmets from copper to bronze, iron, steel and composite, each lit in turn. Camera and subject motion: Lights switch on one by one down the line, over the full clip. Framing: low side angle, deep perspective. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: epic, summarizing. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style:

> Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 164 (8:56, trim to ~3.8s)

[Script Segment] "each step began with a wound the last helmet couldn't prevent."

> **Video Prompt:** Start frame: Close-up row of damaged helmets: a dented copper cap, a split spangenhelm, a punctured Pickelhaube, a dented M1. Camera and subject motion: Slow lateral slide across the damage, over the full clip. Framing: low side close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: sober, meaningful. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 165 (9:00, trim to ~2.8s)

[Script Segment] "But the logic behind it has never changed."

> **Video Prompt:** Start frame: A single modern helmet on a dark pedestal, the faint ghostly outlines of older helmets layered behind it in the haze. Camera and subject motion: Ghost outlines fade in and out, over the full clip. Framing: eye-level medium shot. Lighting: soft backlight creating a thin glowing rim around the silhouette, front mostly in shadow. Ambient motion: thin atmospheric haze drifts slowly through the backlight. Mood: reflective. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 166 (9:03, trim to ~3.4s)

[Script Segment] "Every curve, every layer, and every pad is there because,"

> **Video Prompt:** Start frame: Slow macro details of a modern helmet: the curve of the shell, the layered composite edge, an inner foam pad. Camera and subject motion: Slow continuous glide across details, over the full clip. Framing: macro close-up. Lighting: low raking side light from the right, long soft shadows, specular glints along edges. Ambient motion: faint haze drifts in the darkness and the raking light glints softly along the edges as the view shifts. Mood: appreciative. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.

Beat 167 (9:06, trim to ~3.4s)

[Script Segment] "at some point in history, a helmet without it failed."

> **Video Prompt:** Start frame: The entire chronological lineup of helmets on a long dark table, lights slowly dimming one by one until only the modern helmet remains lit. Camera and subject motion: Lights

> fade to black leaving the last helmet, over the full clip. Framing: low-angle wide shot, deep perspective. Lighting: narrow overhead spotlight forming a pool of light on the table, everything else falling into black. Ambient motion: fine dust motes float slowly through the pool of light. Mood: resolved, haunting. Motion: slow, smooth, weighted and cinematic, no camera shake, no sudden cuts. Keep every object, material and the lighting consistent with the start frame; add nothing beyond what the motion describes, never people, hands, text or logos; no warping or shape changes other than the described action. Visual style: Dark Archive Macro, a photoreal 3D CGI render in a museum-artifact still-life look, low-key lighting with steep falloff into near-black, desaturated charcoal, graphite, worn wood, aged steel and dull bronze with warm brass accents, extremely high surface detail. Duration: 5 seconds, 16:9.
